Letter to the Reader

To Rhode Island Law Enforcement:

According to Rhode Island General Laws (*Chapter 24 12-24-2*), law enforcement agencies are mandated to submit Uniform Crime Reports to the Rhode Island State Police for the purpose of studying the causes, trends and effects of crime in the state.

Rhode Island's UCR Program is structured after the national crime reporting system, which is administered by the Federal Bureau of Investigation. Law enforcement agencies must adhere to the reporting standards and guidelines listed in the following:

- Volume 1: Data Collection Guidelines
- Volume 2: Data Submission Specifications
- Volume 4: Error Message Manual
- Uniform Crime Reporting Handbook Revised 2004
- Uniform Crime Reporting Handbook, NIBRS Edition
- Rhode Island Uniform Crime Reporting Newsletter / Updates
- Standard Report of Rhode Island General Laws/IBR Codes
- Training Guide for Hate Crime Data Collection

UCR guidelines require that police report offenses that occur within their city jurisdiction and that agencies report only those arrests made for offenses committed within their own jurisdiction. Likewise, the recovery of property is reported only by the jurisdiction from which it was stolen.

Also, it is important to classify and score from the records of calls for service, complaints, and/or investigations. Offense counts are to be recorded, not findings of a court, coroner, jury, or decision of a prosecutor since these crime statistics are intended to assist in identifying the law enforcement problem. Agencies are required to adhere to these standards to secure consistency and comparability in the data.

Future updates to the UCR guidelines will be distributed by Newsletters and posted on the Rhode Island State Police web site at www.risp.state.ri.us. These updates should be saved and filed in this Guideline book. If you have any questions or need additional copies of the crime reporting standards and guidelines, call Rhode Island State Police at 444-1156.

Rhode Island General Law - Chapter 24

Uniform Crime Reporting System

§ 12-24-1. Reporting System. – A uniform crime reporting system shall be established under the direction, control and supervision of the superintendent of state police. The superintendent of state police shall have the power and duty, by such rules and regulations as he may deem necessary to collect and gather such information from such local police departments and the enforcement division of the department of environmental management as may be and is hereinafter prescribed.

§ 12-24-2. Reports. – The police department of each city and town and the enforcement division of the department of environmental management, once each quarter, upon a date and form prescribed and furnished by the superintendent of state police, shall forward to the division of state police a crime report. Each reporting department shall report only on cases within its jurisdiction and upon which it is making, or has made, the primary police investigation. The report shall be called the uniform crime report and shall cover crimes reported and otherwise processed during the reporting period. It shall contain the number and nature of offenses and such other information as the superintendent of state police shall specify relating to the method, frequency, cause and prevention of crime. Under no circumstances shall the name of any person be reported.

§ 12-24-3. Compilation of Reports. – Upon receipt of the quarterly uniform crime reports from the reporting agencies, the division of state police shall prepare a statewide compilation of the statistics contained therein and the resulting statistical compilation shall be available to any government agency in the state, the judiciary committees of the Rhode Island senate and the Rhode Island house of representatives, and the federal bureau of investigation, upon request. The statistics made available through the uniform crime report shall be used for the purposes of studying the causes, trends and effects of crime in the state and for intelligence upon which to base a sounder program of crime detection and prevention and the apprehension of criminals.

§ 12-24-4. Other Agencies. – Any governmental agency, not falling within the description of those required to submit the quarterly uniform crime report set forth in 12-24-2, which desires to submit such a report, shall be furnished with the proper forms by the division of state police. When a report is received by the division of state police from a governmental agency not required to make such reports, the information contained therein shall be included within the monthly compilation provided for in 12-24-3.

Objectives

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics for use in law enforcement administration, operation, and management. This compiled data is also intended for the use of other professionals and scholars who have an interest in the crime problem. At the same time, this information is a reference source for the general public as an indicator of the crime factor in our society.

The objectives of the Rhode Island Uniform Crime Reporting Program are:

1. Inform the governor, legislature, other governmental officials and the public as to the nature of the crime problem in Rhode Island - its magnitude and its trends.
2. Provide law enforcement administrators with criminal statistics for administrative and operational use.
3. Determine who commits crimes by age, sex, and race, in order to find the proper focus for crime prevention and enforcement.
4. Provide proper base data and statistics to measure the workload and effectiveness of Rhode Island's Criminal Justice System.
5. Provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
6. Provide base data and statistics to measure the effects of prevention and deterrence programs.
7. Provide base data to assist in the assessment of social and other causes of crime for the development of theories of criminal behavior.

Chapter 1 – Data Elements and Specifications

NIBRS Data Elements

1 ORI Number	26 Age (of Victim)
2 Incident Number	27 Sex (of Victim)
3 Incident Date/Hour	28 Race (of Victim)
4 Cleared Exceptionally	29 Ethnicity (of Victim)
5 Exceptional Clearance Date	30 Resident Status (of Victim)
6 UCR Offense Code	31 Aggravated Assault/Homicide Circumstances
7 Offense Attempted/Completed	32 Additional Justifiable Homicide Circumstances
8 Offender(s) Suspected of Using	33 Type Injury
8A Bias Motivation	34 Offender Number(s) to be Related
9 Location Type	35 Relationship(s) of Victim
10 Number of Premises Entered	36 Offender (Sequence) Number
11 Method of Entry	37 Age (of Offender)
12 Type Criminal Activity/Gang Information	38 Sex (of Offender)
13 Type Weapon/Force Involved	40 Arrestee (Sequence) Number
14 Type Property Loss/Etc.	41 Arrest (Transaction) Number
15 Property Description	42 Arrest Date
16 Value of Property	43 Type of Arrest
17 Date Recovered	44 Multiple Arrestee Segments Indicator
18 Number of Stolen Motor Vehicles	45 UCR Arrest Offense Code
19 Number of Recovered Motor Vehicles	46 Arrestee Was Armed With
20 Suspected Drug Type	47 Age (of Arrestee)
21 Estimated Drug Quantity	48 Sex (of Arrestee)
22 Type Drug Measurement	49 Race (of Arrestee)
23 Victim (Sequence) Number	50 Ethnicity (of Arrestee)
24 Victim Connected to UCR Offense Code(s)	51 Resident Status (of Arrestee)
25 Type of Victim	52 Disposition of Arrestee Under 18

Incident

1 ORI Number - This is the unique nine-character NCIC Originating Agency Identifier (ORI) Number that has been assigned to each agency. The ORI Number is generated automatically by the software application.

2 Incident Number - This number is assigned by the software application to uniquely identify an incident.

3 Incident Date/Hour - This data element must be included in each Incident Report. It should be used to enter the month, day, year, and hour (MM/DD/YYYY/HH) when the incident occurred or started or the beginning of the time period (military time).

4 Cleared Exceptionally - This data element must be included in each Incident Report. It is used to indicate whether or not the incident was cleared exceptionally. If not, N = Not Applicable should be entered. In a multiple-offense incident, the exceptional clearance of one offense clears the entire incident. An incident cannot be cleared exceptionally if it was previously or at the same time cleared by an arrest.

5 Exceptional Clearance Date - If an incident was cleared by exceptional means i.e., a code other than N was entered into Data Element 4, the month, day, and year (MM/DD/YYYY) when the incident was cleared should be entered into this data element.

Offense

6 IBR Code - Select the appropriate title-chapter, the IBR code will back fill with the appropriate IBR code.

7 Offense Attempted/Completed - Indicate whether each offense in the incident was completed or merely attempted. If there was more than one occurrence of the same UCR Offense within an incident and one was completed, then C = Completed must be entered.

8 Offender(s) Suspected of Using - This data element should be used to indicate whether any of the offenders in the incident were suspected of consuming alcohol or using drugs/narcotics during or shortly before the incident; or of using a computer, computer terminal, or other computer equipment to perpetrate the crime. Up to three entries can be made. If the reporting officer did not indicate that any of the offender(s) were suspected of using alcohol, computer equipment, or drugs/narcotics, then N = Not Applicable should be entered.

8A Bias Motivation - This data element should be used to indicate whether or not the offense was motivated by bias and, if so, what kind. Because of the difficulty of ascertaining the offender's subjective motivation, bias should be reported only if investigation reveals sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias against race, religion, disability, ethnicity, or sexual orientation.

Incidents that do not involve any facts indicating biased motivation on the part of the offender are to be reported as 88 = None, whereas incidents involving ambiguous facts (some facts are present but are not conclusive) should be reported as 99 = Unknown.

9 Location Type - This data element is to be used to report the type of location/premises where each offense took place. Only one location can be entered for each offense.

10 Number of Premises Entered - This data element is to be used only if the crime is 220 Burglary/B&E and the Hotel Rule is applicable. In such cases, the number of structures (premises) entered should be reported. This data element appears only under certain conditions.

11 Method of Entry - This data element should be used only if the offense is 220 Burglary/ B&E. It is for reporting whether Force or No Force was used by the burglar(s) to enter the structure. A forced entry is where force of any degree or a mechanical contrivance of any kind (including a passkey or skeleton key) was used to unlawfully enter a building or other structure. An unforced entry is one where the unlawful entry was achieved without force through an unlocked door or window. If both forced and unforced entries were involved in the crime, the entry should be reported as F = Force since the entry was accomplished through Force. This data element appears only under certain conditions.

12 Type Criminal Activity/Gang Information - This data element should be used to provide additional information on the criminal activity of the offender. Up to three types of activity can be entered for each of the offenses. This data element appears only under certain conditions.

13 Type Weapon/Force Involved - This data element should be used to enter the type(s) of weapon(s) or force used by the offender. Up to three types of weapons/force can be entered for each of the offenses.

31 Aggravated Assault/Homicide Circumstances - This data element should be used to describe the circumstances of either an aggravated assault or a homicide. Therefore, it should be used only with 13A Aggravated Assault and 09A-09C Homicide Offenses. This data element appears only under certain conditions.

32 Additional Justifiable Homicide Circumstances - This data element should be used to further describe the circumstances of a justifiable homicide. Therefore, it should be used only for 09C Justifiable Homicide (when either 20 = Criminal Killed by Private Citizen or 21 = Criminal Killed by Police Officer was entered into Data Element 31). Only one code can be entered. This data element appears only under certain conditions.

Victim

The screenshot shows a software window titled "Victim Information #". The window has a menu bar with "Records", "Reg", "Traffic", "Property", "DB", "Checks", "IBR", "Reports", "Analysis", "Status", "RI", and "Exit". Below the menu bar is a toolbar with icons for F1 through F10. The main area has a "Case Activity" tab and a "Victim" sub-tab. The "Victim" sub-tab contains several sections:

- Incident**: "Victim #:" (callout 25) is a yellow box. "of:" is followed by "Connect To" and "Offense" fields. The "Offense" field contains "1 - FUGITIVE FROM JUSTICE" (callout 24). There is a "Confidential?" checkbox.
- Victim Name and Address**: Fields for "Name L:", "F:", "M:", "Jur:", "City:", "State:", "Zip:", and "Street:" (callout 30). Callouts 28 and 27 point to the "State:" and "Zip:" fields respectively.
- Personals**: Fields for "Telephone:" (callout 29), "SSN:" (callout 33), "DOB:" (callout 26), "Age:", "Race:" (callout 28), "Sex:", "Ethnicity:" (callout 29), "Resident Status:" (callout 30), and "Employer:".
- Injuries**: Fields for "Victim Injured?" (checkbox), "Type Injuries - 1:" through "5:" (dropdowns), "Taken To:" (dropdown), "By:" (dropdown), "Physician:", "Date:", and "Time:".

23 Victim (Sequence) Number - Each victim in an incident should be assigned a sequence number from 001 to 999. A separate Victim Segment containing Data Elements 23 through 35 should be submitted for each numbered victim. This is generated automatically by the software application.

24 Victim Connected to UCR Offense Code(s) - This data element should be used to link each victim to the up to ten most serious (as determined by the reporting agency) offenses which were perpetrated against him/her during the incident.

25 Type of Victim - The type of victim should be entered into this data element. Only one code should be entered for each victim.

26 Age (of Victim) - If the victim was a person (I = Individual was entered into Data Element 25 [Type of Victim]), his/her age should be entered into this data element.

27 Sex (of Victim) - If the victim was a person (I = Individual was entered into Data Element 25 [Type of Victim]), his/her sex should be indicated in this data element.

28 Race (of Victim) - If the victim was a person (I = Individual was entered into Data Element 25 [Type of Victim]), his/her race should be indicated in this data element.

29 Ethnicity (of Victim) - If the victim was a person (I = Individual was entered into Data Element 25 [Type of Victim]), his/her ethnic origin should be entered into this data element.

30 Resident Status (of Victim) - If the victim was a person (I = Individual was entered into Data Element 25 [Type of Victim]), his/her resident status (resident or nonresident) should be entered

into this data element. A Resident is a person who maintains his/her permanent home for legal purposes in the locality (town, city, or community) where the crime took place. Concerning university/college campuses, only persons living on campus (in dormitories, etc.) would be considered residents if victimized within the confines of the school property; the crime should be reported by a campus law enforcement agency.

33 Type Injury - This data element should be used to describe the type(s) of bodily injury suffered by a person (I = Individual was entered into Data Element 25 [Type of Victim]).

Offender

34 Offender Number(s) to be Related - This data element should be used, along with Data Element 35 (Relationships of Victim to Offenders), to report the relationships of the victim to offenders who have perpetrated a Crime Against Person or a Robbery against the victim.

35 Relationship(s) of Victim to Offender(s) - This data element should be used along with Data Element 34 (Offender Numbers to be Related) to report the relationship of the victim to offenders who have perpetrated a Crime Against Person or a Robbery against the victim.

36 Offender (Sequence) Number - Each offender in the incident should be assigned a sequence number from 01 to 99. A separate set of offender data should be submitted for each numbered offender. If nothing is known about the offender(s), 00 should be reported. This is generated automatically by the software application.

37 Age (of Offender) - The age of the offender should be entered either as an exact number of years, a range of years, or as unknown.

38 Sex (of Offender) - The sex of the offender should be indicated in this data element.

39 Race (of Offender) - The race of the offender should be indicated in this data element.

Property - Other

14 Type Property Loss/Etc. - This data element should be used to describe the type(s) of property loss, recovery, seizure, etc., which occurred in an incident. A separate Property Segment containing Data Elements 14 through 22 should be submitted for each type of loss/etc.

15 Property Description - This data element should be used to enter descriptions of the property that was burned, counterfeited, destroyed/damaged/vandalized, etc., as a result of the incident.

16 Value of Property - This data element should be used to enter the total dollar values of the property that was burned (includes damage caused in fighting the fire), counterfeited, destroyed/damaged/vandalized, recovered, seized, stolen, etc., as a result of the incident. An agency should report only the value of the property stolen in its jurisdiction. Likewise, the agency that originally reported the property stolen should reported value of the property recovered.

17 Date Recovered - If previously stolen property is recovered, the month, day, and year (MM/DD/YYYY) of its recovery should be entered into this data element. Accordingly, this data element should be used only if 5 = Recovered is entered into Data Element 14 (Type Property Loss/Etc.). If the recovery date is unknown, enter the date of the report.

Property - Vehicles

18 Number of Stolen Motor Vehicles - This data element indicates how many motor vehicles were stolen in a Motor Vehicle Theft incident. Therefore, it should be used only if the offense is 240 Motor Vehicle Theft, 7 = Stolen was entered into Data Element 14 (Type Property Loss/Etc.), and 03 = Automobiles, 05 = Buses, 24 = Other Motor Vehicles, 28 = Recreational Vehicles, or 37 = Trucks was entered into Data Element 15 (Property Description). If the number is unknown, 00 should be entered. Motor vehicles taken as the proceeds of other offenses, i.e., Burglary, Fraud, Embezzlement, etc. should not be entered.

19 Number of Recovered Motor Vehicles - This data element indicates how many motor vehicles were recovered in a Motor Vehicle Theft incident. Therefore, it should be used only if the offense is 240 Motor Vehicle Theft, 5 = Recovered was entered into Data Element 14 (Type Property Loss/Etc.), and 03 = Automobiles, 05 = Buses, 24 = Other Motor Vehicles, 28 = Recreational Vehicles, or 37 = Trucks was entered into Data Element 15 (Property Description). If the number is unknown, 00 should be entered. Motor vehicles recovered as the proceeds of other offenses, i.e., Burglary, Fraud, Embezzlement, etc. should not be entered.

Designator - This data element designates the type of recovery for a Motor Vehicle Theft. Data values include -- stolen locally and recovered locally, stolen locally and recovered outside, and stolen outside and recovered locally.

Property - Drugs

The screenshot shows a software window titled "Drugs #". The menu bar includes: Records, Reg, Traffic, Property, DB, Checks, IBR, Reports, Analysis, Status, RI, Exit. The toolbar contains function keys: F1 (Help), F2 (New), F3 (List), F4 (List), F5 (File), F6-Ins (Insert), F7 (Delete), F8 (Print), F9 (Cancel), F10 (Save), and a checkmark. Below the toolbar are tabs: Vehicles, Drugs (selected), Other, Exit. The main form has the following sections:

- Header:** Drug #: [yellow box] of: Connect to Offense: [] Owner: []
- Description:**
 - Type of Loss: []
 - Property Num: []
 - Description: []
 - Measure: [] Qty.: [] Value: []
- Recovery Information:**
 - Date Recovered: [] Measure: [] Qty.: [] Value: []
- Lab/Entry Information:**
 - Entered: [] Will Drug Be Used As Evidence?
 - Field Test: []
 - Lab Number: [] Analysis: []
 - Troop: [] Barracks: []

Callouts in the image:

- 20: Points to the "Drug Type" dropdown menu in the Description section.
- 21: Points to the "Value" input field in the Description section.
- 22: Points to the "Qty." input field in the Description section.

20 Suspected Drug Type - This data element should be used to identify the types of drugs or narcotics that were seized in a drug case. Therefore, it should be used only if one of the offenses in the incident was 35A Drug/Narcotic Violations, 6 = Seized was entered into Data Element 14 (Type Property Loss/Etc.), and 10 = Drugs/Narcotics was entered into Data Element 15 (Property Description). It also should be entered if one of the offenses is 35A Drug/Narcotic Violations and 1 = None is entered in Data Element 14 (Type Property Loss/Etc.). This data element should not be used when drugs or narcotics were burned, stolen, etc., in connection with other offenses, such as Arson, Burglary/B&E, Larceny/Theft, etc.

21 Estimated Drug Quantity - This data element should be used to indicate the quantity of drugs or narcotics seized in a drug case. Therefore, it should be used only if one of the offenses in the incident was 35A Drug/Narcotic Violations, 6 = Seized was entered into Data Element 14 (Type Property Loss/Etc.), and 10 = Drugs/Narcotics was entered into Data Element 15 (Property Description). If the substance was sent to a laboratory for analysis, and a response has not yet been received, then 1 = None must be entered into Data Element 21 to indicate None. This is an interim report and should be later updated with the true quantity.

22 Type Drug Measurement - This data element should be used to indicate the type of measurement used in quantifying drugs or narcotics seized in a drug case. Therefore, it should be used only if one of the offenses in an incident was 35A Drug/Narcotic Violations, 6 = Seized was entered into Data Element 14 (Type Property Loss/Etc.), and 10 = Drugs/Narcotics was entered into Data Element 15 (Property Description).

This data element should not be used when drugs or narcotics were burned, stolen, etc., in connection with other offenses, such as Arson, Burglary/B&E, and Larceny/Theft, etc.

IBR Reporting

IBR Report Date: IBR Modified Date:

40 Arrestee (Sequence) Number - This number is assigned by the software application.

41 Arrest (Transaction) Number - This number is assigned by the software application to uniquely identify an arrest.

42 Arrest Date - This data element should be used to enter the month, day, and year (MM/DD/YYYY) that the arrest took place.

43 Type of Arrest - This data element should be used to indicate the type of apprehension.

52 Disposition of Arrestee Under 18 - This data element should be used only if the arrestee was 17 years of age or younger at the time of the arrest.

Arrest

45 UCR Arrest Offense Code - The three-digit UCR Offense Code of the offense for which the arrestee was apprehended should be entered into this data element. If the arrestee was apprehended for more than one offense, the reporting agency must determine which was the most serious offense and enter it as the arrest offense.

***Important Note:** An important function of the system is to accurately count crimes committed. In a case where there is both an Incident Report and an Arrest Report, the crime would be counted twice if the cases are not linked to each other.

- 1.) On the Arrest Tab of the Arrest Report be sure to enter the Case Number of the Incident Report that you want to link to the Arrest report.
- 2.) On the Offense tab of the Arrest Report, be sure to check off the box "Originated in Another Case" if it is not already checked off.

Arrest

The screenshot shows a software interface for 'Vitals Information'. At the top, there is a menu bar with options: Records, Reg, Traffic, Property, DB, Checks, IBR, Reports, Analysis, Status, RI, Exit. Below the menu is a toolbar with function keys F1 through F10. The main form has several tabs: Vitals, Description, Scars/Marks/Tatoos/Mo's, Alias, Gang/Family/Job/Birthplace, Associates, and Exit. The 'Vitals' tab is active. There are checkboxes for 'Runaway?', 'Suicidal?', and 'Sex Offender?'. The form is divided into sections: 'Name And Address' with fields for Name L, F, M, Jur, City, State, Zip, and Street; 'Personals' with fields for Telephone, SSN/Sys (000044633), DOB (08/08/1978), Age (23), Race (W), Sex (M), Ethnicity (H), and Resident Status (N); and 'Finger Prints, State/Fed/NCIC Information' with fields for Printed? (checked), Photoed? (checked), R Hand, L Hand, Henry, St ID, FBI ID, License State (RI), Num, Arresting Offense (1), Armed With #1 (01), and Armed With #2. Callouts 46 through 51 point to the 'Armed With #1' field, the 'Age' field, the 'Sex' field, the 'Race' field, the 'Ethnicity' field, and the 'Resident Status' field, respectively.

46 Arrestee Was Armed With - This data element should be used to indicate whether the arrestee was armed with a commonly known weapon at the time of his/her apprehension. Up to two entries can be made.

47 Age (of Arrestee) - The age of the arrestee should be entered either as an exact number of years, a range of years, or as unknown.

48 Sex (of Arrestee) - The sex of the arrestee should be indicated in this data element.

49 Race (of Arrestee) - The race of the arrestee should be indicated in this data element.

50 Ethnicity (of Arrestee) - The ethnic origin of the arrestee should be entered into this data element.

51 Resident Status (of Arrestee) - Whether the arrestee was a resident or nonresident should be entered into this data element. A Resident is a person who maintains his/her permanent home for legal purposes in the locality (i.e., town, city, or community) where the crime took place.

Additional Incident: [] Add Information To Arrest?

44 Multiple Arrestee Segments Indicator - This data element should be used to ensure that an arrestee is counted (scored) only once when the arrestee's apprehension causes the arresting agency to submit two or more Arrestee Segments concerning separate Group "A" Incident Reports. That is, the arrestee was involved in more than one crime incident and his/her arrest data are duplicated in each Group "A" Incident Report. In such a situation, C = Count Arrestee should be entered into one of the Arrestee Segments, and M = Multiple should be entered into all of the remaining Arrestee Segments. If the arrestee's apprehension does not cause the arresting agency to submit multiple Arrestee Segments, N = Not Applicable should be entered.

Chapter 2 – Data Submission Requirements

Rhode Island State Police IBR Data Submission Requirements

Electronic IBR data should be validated according to Error Checking Procedures and sent to the Rhode Island State Police no later than 7 days after the close of the reporting period. A total of twelve (12) submissions per year should be sent to the State UCR Unit, one for every month.

Send to:

Rhode Island State Police
Uniform Crime Reporting Unit
311 Danielson Pike
North Scituate, RI 02857

We respectfully request your cooperation in meeting this requirement to ensure submission of data in a timely manner and to maintain credible data.

Chapter 3 – Ten Steps to Effective Records Management

Ten Steps to Effective Records Management

To reduce the likelihood of incomplete or inaccurate crime data, it is important that law enforcement agencies are following appropriate procedures for effective records management.

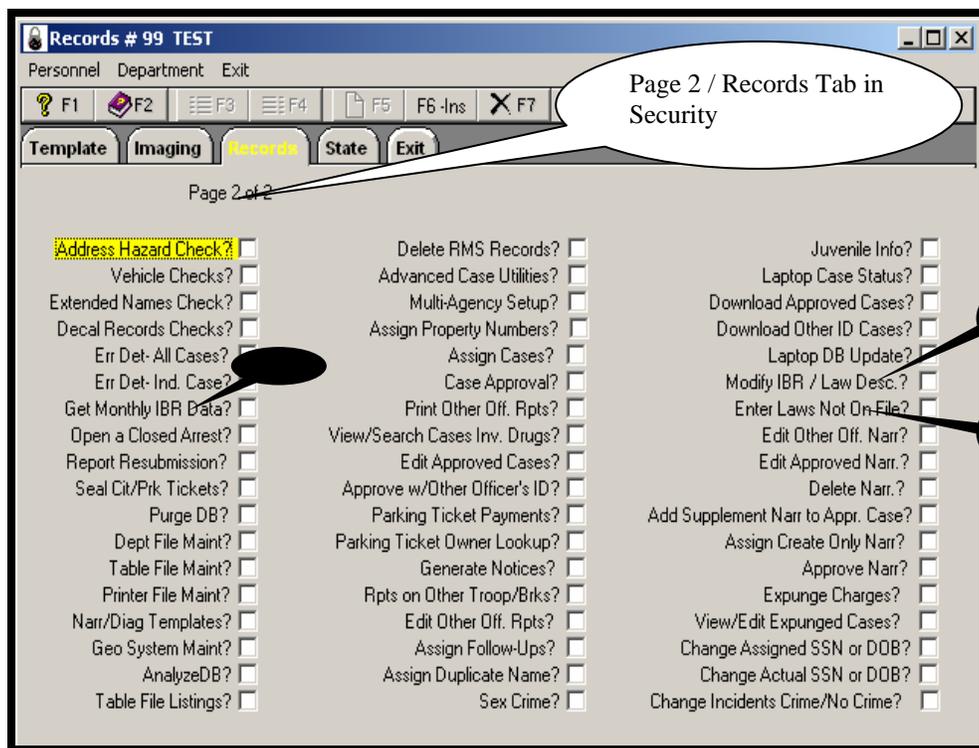

1. Security Rights

Security rights are an important consideration in maintaining a Records Management System. To reduce the likelihood of inaccurate data, it is recommended that security rights are carefully reviewed and analyzed. Listed below are suggested IBR security settings to be locked and only the UCR/RMS System Administrator/s should have security rights to the three-(3) settings listed below. It is suggested that the preliminary officer does not have security rights to these settings. Authorized personnel should do this only.

Get Monthly IBR Data

Modify IBR / Law Desc.

Enter Laws Not On File

Screen representations may vary depending on the version of the software that is installed.

Effective Records Management

2. Standard Report of Rhode Island General Laws/IBR Codes

To merge in the new State Law File and to obtain the most recent update to the Rhode Island General Laws/IBR Codes “Update to New Laws” as indicated below. This will ensure that the most recent general law list is available for the preliminary officer when entering incident and arrest data in the Records Management System. It is recommended that the UCR/RMS Administer/s update the laws when performing RMS system maintenance. Authorized personnel should do this only.

SUGGESTION

CONTACT YOUR SOFTWARE VENDOR PRIOR TO UPDATING THE LAW LIST. THIS PROCESS WILL ALLOW THE VENDOR TO BACKUP THE OLD TABLE FILE PRIOR TO THE UPDATE.

A detailed report of the Rhode Island General Laws/IBR Codes can be found in this book and is also available on the Rhode Island State Police web site.

Important Note: Should you detect any discrepancies in the IBR codes, please contact the Uniform Crime Reporting Unit at 444-1156.

Effective Records Management

3. All calls for service, regardless of their seriousness, should be initially recorded in a manner that clearly defines the referral of the call.
4. A written report should be prepared or computer entry is made showing the full details of the offense as disclosed by investigation. The preliminary officer should carefully review written report/computer entry.
5. A supervisor should error check incident/arrest report to verify accuracy and completeness.
6. Agency should have a procedure for classifying and scoring all incidents/arrests in accordance with the National Incident Based Reporting System.
7. A tracking procedure should be in place to determine that arrests, clearances, and/or unfounded cases are reported accurately.
8. Agency should have a written procedure in place to double-check each report to ensure that case is submitted correctly for UCR purposes. Law enforcement agencies must have a proven, effective program and have instituted acceptable error checking procedures and quality control procedures.

Data Quality Issues

Listed below are criteria for flagging data for reasonableness. This criteria will assist in identifying issues before sending a mass mailing to local law enforcement agencies. Areas that are of concern and should be review by law enforcement included:

- | | |
|---|---|
| ✓ Aggravated Assaults greater than Simple Assaults | ✓ Burglaries higher than Larcenies |
| ✓ Motor vehicle thefts with low number of vehicles other than automobiles | ✓ Weapons used in Aggravated Assaults – high number of personal weapons |
| ✓ Rapes higher than Robberies | ✓ Forcible entry Burglary should be the largest number; however, non- forcible and attempted should also be reported |
| ✓ Plus or minus 15% change at 6 and 12 month intervals for individual offense categories – but also taking into account agency population, offense and month to month changes | ✓ Other suggested reports: Larceny of Structure; Agg. Assaults w/o injuries or weapons; Simple Assaults w/ minor injuries w/o weapons |

Agency should keep the Uniform Crime Reporting Guideline book up-to-date. Future updates to the UCR guidelines will be distributed by Newsletter and posted on the Rhode Island State Police web site. Updates and data quality issues should be retained and filed in this Guideline book.

9. Agency should create (written or computer) a summary report each month/quarter prior to submitting data to the UCR Unit. Also, copies of crime reports should be retained and filed at the local law enforcement agency for verification.
10. Agency should have a procedure in place to ensure timely crime reporting submissions to the Rhode Island State Police in accordance with data submission requirements.

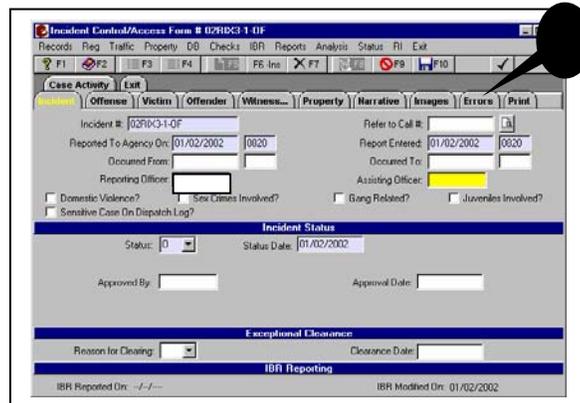

While following these ten steps does not guarantee the integrity of crime data, it does indicate that law enforcement agencies are following appropriate procedures for effective records management.

Chapter 4 – Error Checking Procedures

Error Checking Procedures

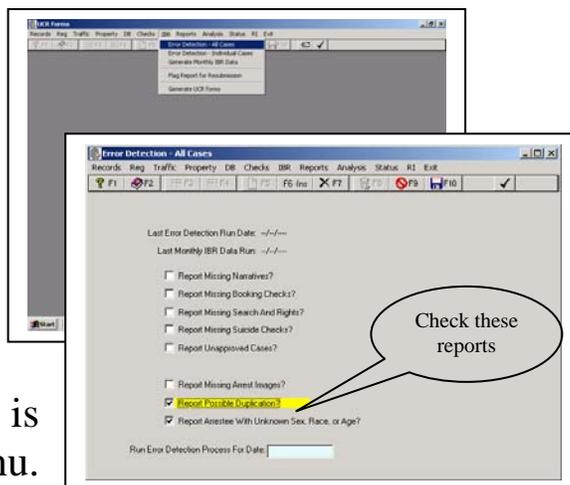

This recommended error-checking procedure is to assist law enforcement agencies in securing accurate UCR/IBR crime data in accordance with the National Incident Based Reporting System. This procedure is intended to enforce error-checking practices that will ensure a reliable set of criminal statistics for each city and town.

Step 1. Preliminary investigator should carefully review the computer entry and error check at the data entry level, which is available on the error tab when the case is opened.

REVISE CASE TO REFLECT CORRECT CRIME COUNTS

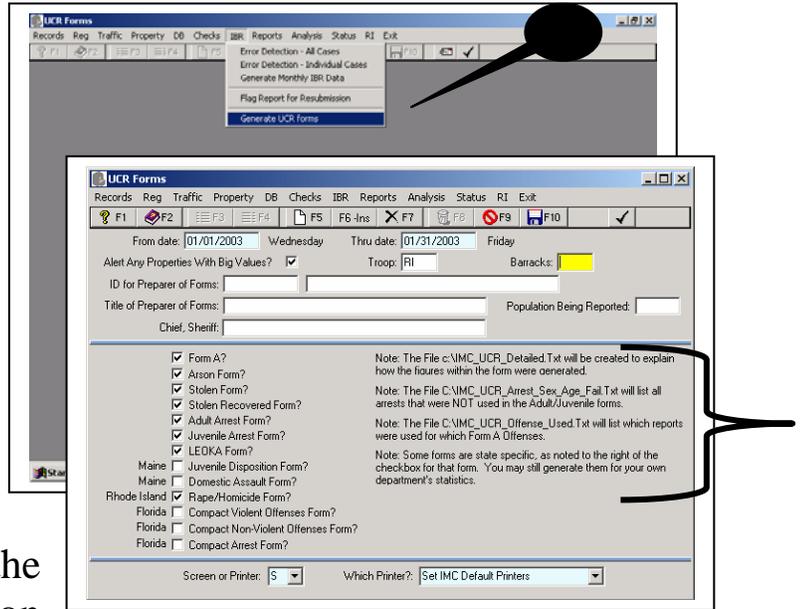

Step 2. A supervisor should check each case for accuracy and completeness. Error check at the supervisor level by performing the **Error Detection - All Cases**, which is available on the IBR pull down menu. Be sure to check “*Report Possible Duplication*” and “*Report Arrestee With Unknown Sex, Race, Age*”. This will generate an *IBR Error Detection Report* and will list a message indicating reason case is not included in crime counts. (Repeat process as necessary.)

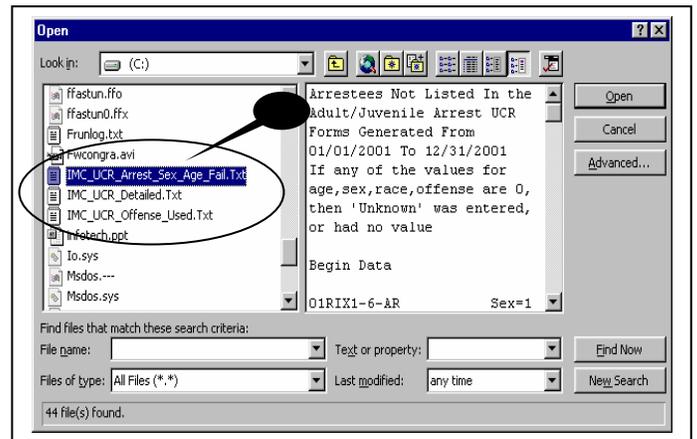

REVISE ALL CASES TO REFLECT CORRECT CRIME COUNTS

Error Checking Procedures

Step 3. The UCR/RMS Manager should generate a *draft* Uniform Crime Report and review for accuracy. When this report is generated, behind the scene *txt* files are created that provide a list of the cases, which are included on the report. This *draft* report should be generated each month and/or/quarter prior to submitting the final report to the Rhode Island State Police, UCR Unit.

Step 4. The UCR/RMS Manager should validate the crime reports by tracking cases. Refer to the following files which are available through WordPad/Microsoft Word:

C:\IMC_UCR_Arrest_Sex_Age_Fail.Txt
 C:\IMC_UCR_Detailed.Txt
 C:\IMC_UCR_Offense_Used.Txt

Common Problem:

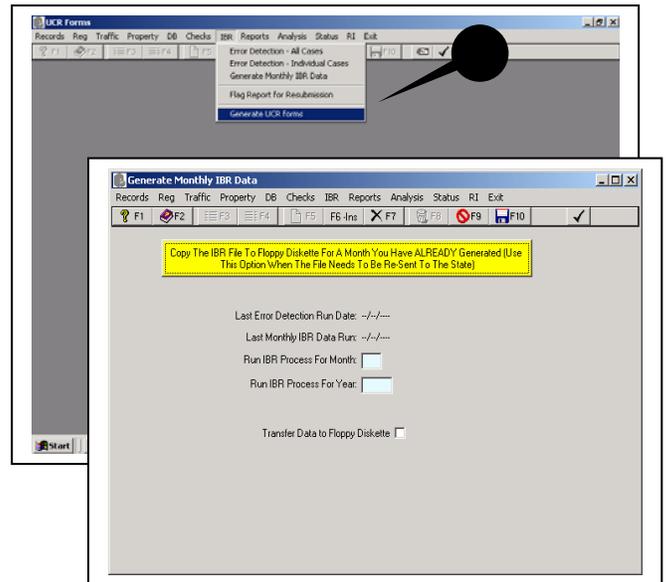

If **UNKNOWN** is entered for the **age, sex, or race of the arrestee**, the case **WILL NOT** appear on the UCR Summary Based Report. Summary Based does not collect data on the category of UNKNOWN.

REVISE ALL CASES TO REFLECT CORRECT CRIME COUNTS

Error Checking Procedures

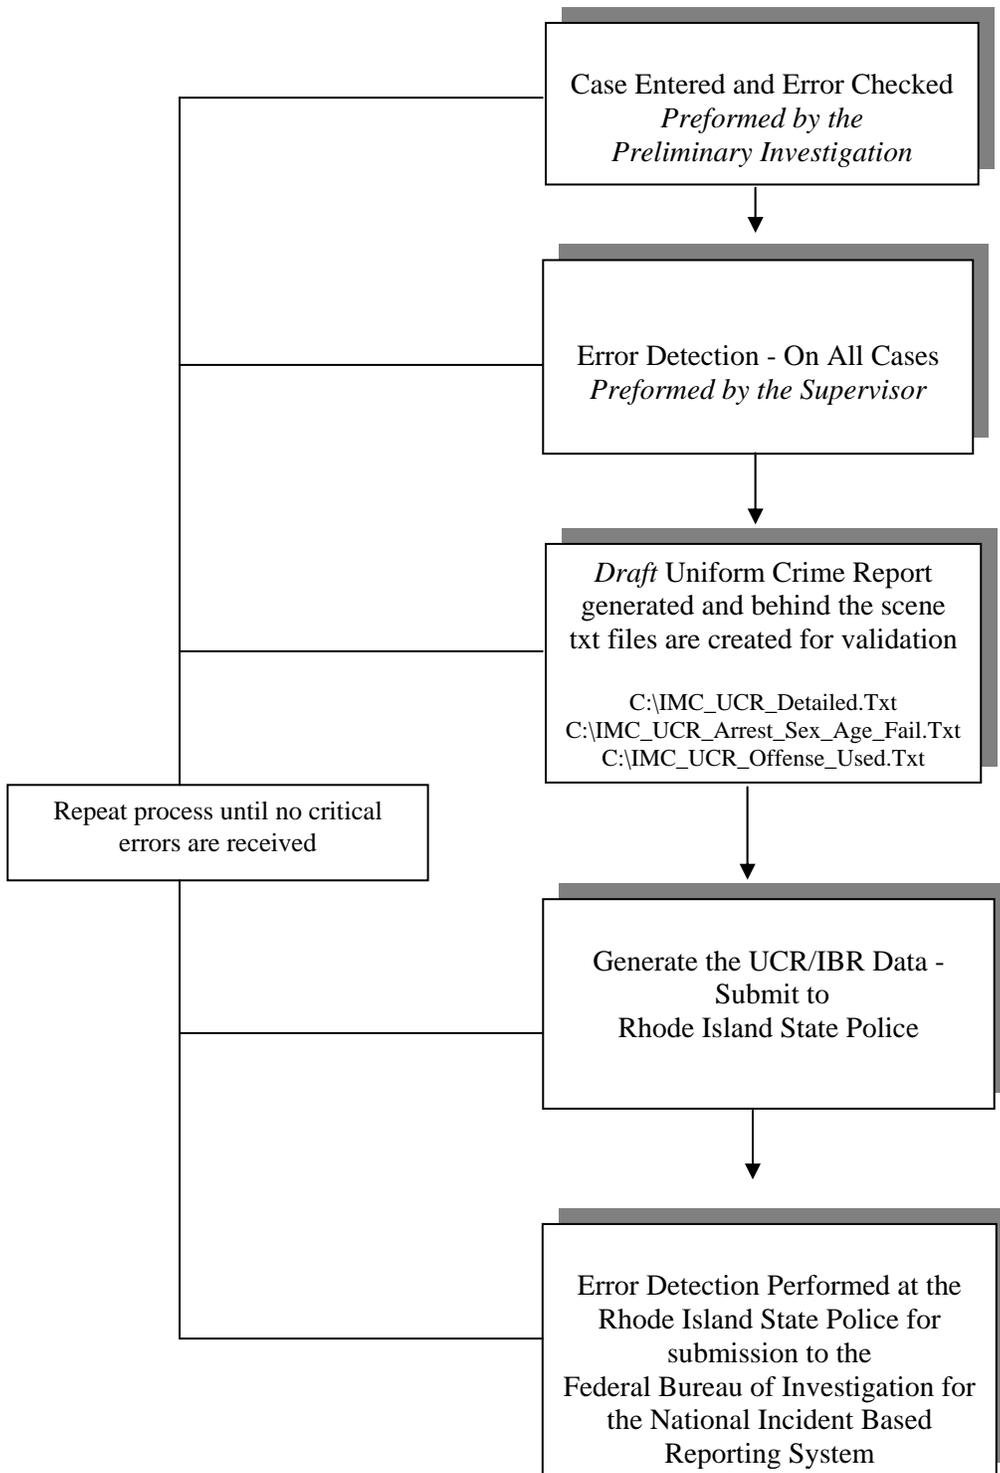

Step 5. The UCR/RMS Manager should generate the final UCR report and electronic IBR data, available on the IBR pull down menu. Run the IBR Process for the month and submit data according to State Data Submission Requirements.

(Note: Prime date must be set to generate NIBRS data, contact the software vendor to obtain instructions)

**IBR DATA CAN NOT BE GENERATED UNLESS ALL
CASES FOR TIME PERIOD ARE ERROR FREE.**

Rhode Island Error Checking Procedures

Chapter 5 – NIBRS Test Scenarios

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE
Uniform Crime Reporting

NIBRS Test Scenarios

The NIBRS test scenarios provided in this section have been developed to assist local/state law enforcement agencies and to exercise your RMS system capabilities by processing and validating the administrative, offense, property, victim, offender, arrestee, property segments in accordance with National Standards and Guidelines.

These scenarios are intended to be a tool for law enforcement and it is recommended that each law enforcement agency enter the test scenarios into a “Training RMS System” and carefully review and error check each case in your RMS System

Note ...

The “Training RMS System” should be the most current version of the software. Contact your software vendor to obtain the latest version.

On July 9, 1996, at 0210 hours, officers respond to an alley for the “sounds of gunshots.” Once on the scene, they discover a white male, in his thirties, deceased due to multiple gunshot wounds to the head and body.

Witnesses report observing an argument between the decedent and a white female immediately prior to the gunshots.

No. 1. Basic homicide scene. One Administrative, one Offense, one Victim and one Offender segment(s).

On July 6, 1996, at approximately 0845 hours, officers respond to a residential neighborhood for a report of a larceny from vehicle. While at the scene, they are approached by three other victims also complaining of radios being stolen from their vehicles. Investigation disclosed that these thefts took place between the hours of 0200-0800 within a two-block area. The radios are valued at \$100 each.

Incident number: 123002

Victims:

- 1. White Male 25 Resident-Not of Hispanic Origin
- 2. Black Male 45 Resident-Not of Hispanic Origin
- 3. Black Female 34 Resident-Hispanic Origin
- 4. White Male 56 Nonresident-Hispanic Origin

No. 2. This scenario emphasizes incident definition as well as the *same time and place* rule regarding the scoring of crimes against property. The *same time and place* rule means that the time interval between the offenses and the distance between the locations where they occurred were insignificant. One Administrative, one Offense, one Property, four Victims and one Offender segment(s).

A tourist charter bus, carrying a driver and ten passengers is held up by three drunken white males. Two were in their late teens, the leader slightly older in appearance. The males are armed with a shotgun, rifle, and Tec-9 automatic pistol. The bus driver, Victim 1, recognizes the second offender as the 22-year-old son of a neighbor. None of the other passengers recognized any of the offenders.

Stolen in the robbery were personal belongings consisting of three watches (\$450); one fur coat (\$750); four purses (\$40) containing U.S. Currency (\$350) and one Sony Walkman (\$75).

Offense took place on July 1, 1996, at approximately 1400 hours on 5th and Dogwood Streets.
Incident number: 123003

Victims:

1. W/F 34 Driver/Resident-Not of Hispanic Origin
2. W/M 24 Hispanic Origin/Nonresident
3. B/F 55 Not of Hispanic Origin/Nonresident
4. W/F 16 Not of Hispanic Origin/Nonresident
5. B/F 34 Not of Hispanic Origin/Nonresident

No. 3. This scenario exercises system's capability to accept at least eleven victims. It also categorizes various weapons used in the offense, as well as combining values for like property categories. One Administrative, one Offense, one Property, eleven Victims and three Offender segment(s).

Three black males, ages (18, 23, 25), armed with handguns, kick open the door to an apartment occupied by a black male, age (30), and a black female, age (26). The first black male, 18, takes the woman into a bedroom and rapes her, inflicting minor injury. The other males ransack the apartment and take a VCR (\$300), cash (\$1000) from the male resident, as well as the keys to his automobile (\$19000). The male resides in the apartment. The woman is an out-of-town visitor. The male victim recognizes suspect number two as a resident of the apartment complex. The female victim reported that the offender said he was high on loveboat (PCP). The suspects then drove away from the scene in the victim's vehicle which had been parked in the apartment complex parking lot.

Incident number: 123004

Incident Date/Hour: July 10, 1996 at 0050 hours

Offenders:

Black Male 18

Black Male 23

No. 4. Note no distinction is made between the offenders regarding drug use. Data element 8 is to be used to indicate whether any of the offenders in the incident were suspected of consuming alcohol or using drugs/narcotics during or shortly before the incident. One Administrative, three Offense, one Property, two Victim, and three Offender segment(s).

A homeowner returned from a two-week vacation and discover that his home has been burglarized. Entry was gained by cutting a hole in a sliding glass door and releasing the lock. One bottle of wine was consumed. The owner had previously participated in Operation I.D. and had engraved his social security number on the television, compact disc player, and bicycle. The owner left on November 4, 1996 at 0700 and returned on November 18, 1996. The owner is a white male 43.

Incident number: 123005

Stolen was the following:

- Three bottles of wine (\$30)
- One bicycle (\$300)
- \$65 in U. S. Currency
- Checkbook containing 20 checks in Victim's name
- One VCR (\$300)
- One TV (\$400)
- CD Player (\$150)
- .45 Caliber Glock (\$450)
- Set of encyclopedia books (\$1200)
- Sixty tablets of Valium (\$10)
- One Rolex Watch (\$7500)
- One window air conditioning unit (\$300)
- One personal computer (\$1500)

No. 5. Up to ten (10) property descriptions can be entered for each Property Segment (i.e., each type of property loss/etc.) involved in the incident. If more than ten types of property are involved, the nine (9) most valuable specifically codable types of property are to be entered and the remaining types of property are to be combined and entered as 77 = Other. This scenario uses more than ten property types. One Administrative, one Offense, one Property, one Victim and one Offender segment(s).

Undercover officers, over a three-month period, have made a number of heroin and cocaine purchases from three investigative targets who operate in an open-air drug market on a street corner. During that period, no arrests have been made due to the continuing nature of the investigation. Purchased during the operation were 30 grams of cocaine and 25 grams of heroin. A confidential informant has supplied information that a PC Computer is used to store records pertaining to the operation. The investigation has determined the safe house (\$95,000) for the drugs and that a 1996 Nissan Pathfinder is used to transport the drugs. A search warrant is obtained and served on September 9, 1996, at 0500 hours.

Seized during this warrant are pharmaceutical scales (\$100), a thousand small glassine envelopes (\$50), 100 hypodermic syringes (\$100), a 9mm handgun (\$200), a sawed-off shotgun (\$200), 40 grams of cocaine, 25 grams of heroin, a thousand tablets of unknown origin, Personal Computer (\$1500), the Nissan Pathfinder (\$18000) and the safe house. Arrested are the three targets. (Assume that the seized weapons violate local weapon possession laws.)

No. 6. This scenario documents a CCE case ordinarily run by local agencies on open-air drug markets. It emphasizes the continuing nature of narcotics investigations to be determined as a single incident for NIBRS documentation. Also included is property seized for forfeiture. The UCR Arrest Offense Code, Data Element number 45, is being provided in each Arrestee Segment as 35A = Drug/Narcotic Violations, assuming this offense served as the basis for the search warrant. The Estimated Drug Quantity is achieved by combining the quantities of drugs seized, as well as purchased in this scenario.

*This is being used to demonstrate that the value, 10 = Drug/Narcotics, must be left blank when the offense submitted is 35A = Drug/Narcotic Violations. One Administrative, three Offense, one Property, one Victim, three Offenders and three Arrestee segment(s).

A fire breaks out in a single family home valued at \$65,000. A small child, age 8, dies from smoke inhalation. Three other family members suffer substantial second and third degree burns. The home is a total loss. Additional loss of household goods occurred, with a value unknown at this time.

Investigation determines that the fire was started by a Molotov Cocktail.

Victims:

1. Korean Female, 8, Resident
2. Korean Male, 37, Resident
3. Korean Female, 35, Resident
4. Korean Male, 10, Resident

No. 7. Until additional loss of household goods, coded as "88" - Pending Inventory can be determined, the value of Property Loss of 1 = Unknown is mandatory. One Administrative, three Offense, one Property, four Victims and one Offender segment(s).

Three members of a fringe neo-nazi group break into a Jewish synagogue. While inside, they spray paint anti-semitic slogans throughout the synagogue. They locate the rabbi and kick him into unconsciousness. The rabbi sustains several broken ribs. Prior to leaving, the vandals slosh gasoline around the premises. The police arrive on the scene and apprehend two of the three suspects while they were attempting to ignite the gasoline. Repair estimate for vandalism damage is \$2500.

Victims: Synagogue, Rabbi (W/M 62)

Offenders: Offender 1 White Male, 18 Arrested
 Offender 2 White Male, 17 Arrested
 Offender 3 White Male, 15-17

No. 8. This is a hate crime. The scenario demonstrates the no-hierarchy rule in NIBRS, as well as stressing different property types and distinguishing between attempts and completions of criminal acts. The Arrest Code, 13A = Aggravated Assault, was chosen to be used in data element number 45 due to the severity of the crime and it being a crime against persons. However, this code is to be determined at the discretion of the reporting agency. In this case, 200 = Arson or 290 = Destruction/Damage/Vandalism of Property could have been used.
 Note: The handling of juvenile "Arrestees" vary greatly from jurisdiction to jurisdiction. In this scenario, due to the severity of the crime, R = Referred to other authorities, was chosen as the most likely choice for a crime of this nature. One Administrative, four Offense, two Property, two Victim, three Offender and two Arrestee segment(s).

An offender, armed with a semi-automatic rifle (AR-15) and distraught over his wife’s decision to leave him enters his wife’s workplace. The wife has the couple’s two children with her. The offender shoots a security guard. He takes his wife, his children and two other persons hostage. All are held at gunpoint. After a four-hour standoff, the suspect surrenders.

The wife is employed as an accountant at Wal Mart. The offender is a Sioux Indian, 37 years of age and is a nonresident. The security guard dies at the scene.

Victims:

- Victim 1 Guard White Male 53 Resident
- Victim 2 Daughter Sioux Indian 10 Nonresident
- Victim 3 Son Sioux Indian 8 Nonresident
- Victim 4 Wife Sioux Indian 36 Nonresident
- Victim 5 Co-Worker Black Female 42 Nonresident
- Victim 6 Co-Worker Chinese Female 54 Resident

No. 9. This scenario emphasizes NIBRS crime definitions and linking offender to victims correctly. One Administrative, two Offense, one Property, six Victims, one Offender and one Arrestee segment(s).

After arriving home from work, the owner discovers that the rear door to his house has been kicked in. The premises have been ransacked. An inspection determined the following items to be stolen. One video cassette recorder (\$300), \$250 dollars in U. S. Currency, a cordless electric drill (\$40), and a carton of cigarettes (\$20).

The owner left his residence at 0800 and returned the same day at 1800 hours.

Victim: Black Male-36-Not of Hispanic Origin

No. 15. This scenario stresses the UCR Summary and NIBRS arrest reporting rules. The arrest for the offense of Robbery would be reported by the originating agency. Group B offense Arrestee segment only.

A search warrant is served on a sidewalk vendor that sells NFL Logo sweatshirts and T-shirts. During the search, 20 videotapes of a recent hit movie, 200 T-Shirts, and 100 sweatshirts are seized. The investigation along with an examination of the merchandise determines that the clothing is not licensed nor are the copies of the movie authorized. The vendor is arrested at the scene.

T-Shirts valued at \$800

Sweatshirts valued at \$600

Tapes are valued at \$200

The sidewalk vendor is a black male, 34, and is a resident of the jurisdiction.

No. 18. Basic parental kidnaping case. One Administrative, one Offense, one Property, one Victim, one Offender segment(s).

Police are called to a large office building for a theft report. A secretary tells them that she left her desk for 15 minutes and upon her return she discovered that her purse was missing from underneath her desk. The purse, valued at \$10, contained \$45 in U.S. currency, a checkbook with 15 checks and personal papers. The secretary is a 34-year-old black female.

There were no witnesses to the offense.

No. 19. Straightforward theft from building incident. One Administrative, one Offense, one Property, one Victim, and one Offender segment(s).

A seven-year-old white male disappears from the front yard of his home. After several hours, the parents notify the police. A two-day search by police and community volunteers ends when the youngster is found wandering by a highway. After interview of the boy, it is determined that he had been victimized by forcible sodomy. He is unable to describe the offender other than stating it was "a man that hurt me."

No. 22. Public corruption case.

Note: When governmental official accepts bribe, the victim must be Government and not Society/Public. Edit #467 prohibits S = Society/Public from entry when data element #24 contains a crime against property. One Administrative, one Offense, one Property, one Victim, two Offender and two Arrestee segment(s).

On July 4, 1994, a partially clothed female body is found in a wooded area. Investigation reveals that the woman was abducted, forcibly raped, and murdered. The case remained unsolved for two years.

On July 4, 1996, a white male, 36, walks into the police station and asks to speak with a detective. The detective interviews the individual who states that his conscience is bothering him and he wishes to confess. He relates details about the offense that only the offender and the investigating officers know. He is a resident of the jurisdiction.

Officers responded to a residence for a silent burglar alarm. As they arrived on the scene, they observed a black male, 18, coming out the front door with a computer monitor (valued at \$300). The front door lock has fresh pry marks. The owners are contacted and they confirm the burglary. The suspect is arrested and taken to the police station where he is interviewed by detectives. The suspect confesses to a previous burglary that occurred on November 19, 1996 and reported under incident number 123010. The owner is a black male, age 43.

No. 24. Original burglary incident arrest results in clearance of previous burglary incident. Data Element (Multiple Arrestee Indicator) used to demonstrate that an arrestee was involved in more than one crime incident and his/her arrest data are duplicated in each Group "A" incident report. *All of incident number 123010 should be resubmitted. This has been included to show all necessary changes to the Offender segment in scenario number 123010 to pass edits. One Administrative, one Offense, two Property, one Victim, one Offender and one Arrestee segment(s) as well as update previous incident.

Resubmitted SCENARIO #10 PG. 1

After arriving home from work, the owner discovers that the rear door to his house has been kicked in. The premises have been ransacked. An inspection determined the following items to be stolen. One video cassette recorder (\$300), \$250 dollars in U. S. Currency, a cordless electric drill (\$40), and a carton of cigarettes (\$20).

The owner left his residence at 0800 and returned the same day at 1800 hours.

No. 26. This scenario involves a Group B Offense (DUI) resulting in the seizure of narcotics that creates a Group A incident. One Administrative, one Offense, one Property, one Victim, one Offender and one Arrestee segment(s).

Police investigation has revealed that a previously reported Homicide/Arson incident (123007) was motivated by anti-Asian bias. The family recently moved into the neighborhood and had received several telephone threats. The investigation also established the identity of two suspects that were arrested on warrants. These arrests took place on September 24, 1996 and the suspects were unarmed.

No. 27. Additional investigation determined that arson/homicide incident was motivated by anti-Asian/Pacific Islander bias. Update incident report. Note: Until additional loss of household goods, coded as "88" = Pending Inventory can be determined, the value of 1 = Unknown is mandatory. One Administrative, three Offense, one Property, four Victim, two Offender and two Arrestee segment(s).

Hunters, while walking through woods, discover a body at the base of a tree. Police are called to the scene. A forensic examination determines that the male has been shot several times in the back of the head and that the locations of the wounds eliminate the possibility of suicide. The Medical Examiner/Coroner has determined that the decedent is a white male in his early twenties.

No. 28. This scenario demonstrates the use of *Report Date* in Data Element 3. If the "Incident Date" is unknown, enter the date of the report with the indicator R = Report. If the "Incident Hour" is unknown, leave the hour blank. If the date and hour are unknown but the date of the report was November 29, 1996, the entry should be 11/29/1996/R/bb (where "b" equals a blank). One Administrative, one Offense, one Victim, and one Offender segment(s).

While riding an escalator at a large department store, a white male (47) is jostled by a white male moving past him. Shortly thereafter, the victim realizes that his wallet is gone from his right rear pants pocket. Stolen was his wallet containing \$85 in cash. The victim values the wallet at \$20.

No. 29. One Administrative, one Offense, one Property, and one Victim segment(s).

At an airport, a Lincoln Town Car is rented for a week. A credit card is tendered for payment. A week later the vehicle has not been returned. The rental car company checks with the credit card issuer and is informed that the card has been reported stolen. The rental agent does not have specific memory of the transaction. The vehicle was rented on December 11, 1996, at 1400 hours. The vehicle is valued at \$37,000 dollars.

No. 30. One Administrative, one Offense, one Property, one Victim, and one Offender segment(s).

Police are called to meet the manager of a self-storage facility. Once on the scene, they determine that six storage facilities have been forced open. The manager has prepared an inventory list of missing property from three owners. It is not determined what is missing from the other three storage areas. The offense took place on November 11, 1996. The premises were left secure at 2100 hours on November 10, 1996.

Stolen was the following:

- One Couch (\$350)
- Washer/Dryer (\$600)
- Two Typewriters (\$250)
- 100 Record Albums (\$300)
- Two Snow Tires (\$150)
- Three Bicycles (\$450)
- One Chain saw (\$250)

Victims:

- Victim 1 Business
- Victim 2 Business
- Victim 3 White Male, 24, Resident
- Victim 4 Black Male, 35, Resident
- Victim 5 Business
- Victim 6 Asian Male, 42, Resident
- Victim 7 Business - Self-Storage Facility

No. 31. This scenario illustrates NIBRS consideration of hotels or storage areas in terms of reporting one offense against property. *Note: Six individual storage facilities have been burglarized, generating six Victim segments as listed. A seventh Victim segment is generated as the storage company itself is also a victim. Up to ten (10) property descriptions can be entered for each Property segment (i.e., each type of property loss/etc.) involved in the incident. If more than ten types of property are involved, the nine (9) most valuable specifically codable types of property are to be entered and the remaining types of property are to be combined and entered as 77 = Other. One Administrative, one Offense, one Property, seven Victims, and one Offender segment(s).

A black male, age 23, is stopped at a DUI checkpoint. An NCIC check confirms that the car, a 1997 BMW 325i, is listed stolen from another state. The driver is arrested for possession of stolen property. The car is valued at \$42,000.

Offender: Black male, 23, Resident, Non-Hispanic

Incident Date/Hour: December 20, 1996, 0135

Incident number: 123032

ADMINISTRATIVE SEGMENT

Chapter 7 – Newsletters/Updates

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

Edition 1

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Guidelines and Standards

Frequently asked questions. . .

All offenses reported to the UCR Program, regardless of what the offense is called at the local or state level, should conform to the UCR classification of offenses. (*Uniform Crime Reporting Handbook, 1984, p.3*)

For crimes against persons, score one offense for each victim (*Uniform Crime Reporting Handbook, 1984 p.6 and Uniform Crime Reporting Handbook, NIBRS Edition, p 29*)

For crimes against property, score one offense for each distinct operation, except in the case of motor vehicle theft for which one offense is counted for each stolen vehicle. (*Uniform Crime Reporting Handbook, 1984 , p. 6 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 29*)

Property Values

Procedures suggested by the national Program for property evaluation are: fair market value, wholesale cost (for retail establishments, victim's evaluation, replacement cost, common sense and good judgement. (*Uniform Crime Reporting Handbook , 1984, p.49 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 43*)

Property segments are used to describe the type, value, and (for drugs and narcotics seized in drug cases) quantity of property involved in the incident. A property segment should be submitted for each type of property loss. (*Uniform Crime Reporting, National Incident Based Reporting System, Volume 1, Data Collection Guidelines, August 2000, p. 61*)

Summary Based Reporting Guidelines

In multiple-offense situations, apply the Hierarchy Rule, which requires "counting only the highest offense ... and ignoring all others ... (*Uniform Crime Reporting Handbook, 1984, p. 33*)

Hierarchy Rule does not apply to arson, and this crime is always reported even in multiple offense situations ...

Classifying Offenses

Law Enforcement should classify and report offenses after preliminary confirmation of a call for service or a complaint establishes that a crime was, in fact, committed. Offenses known to law enforcement are to be recorded, **not** findings of a court, coroner, jury, or decision of a prosecutor since crime statistics generated from NIBRS are intended to assist in identifying law enforcement problems.

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

Edition 2

**Uniform Crime Reporting
Newsletter / Updates
Incident Based Reporting Standards**

Law Enforcement Officers Killed or Assaulted (LEOKA)

The LEOKA form is to be used by agencies to report line-of-duty felonious or accidental killings and assaults on sworn law enforcement officers. (*Uniform Crime Reporting Handbook, 1984, pp. 65-66 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 61*)

Count all assaults which resulted in the serious injury or in which a weapon was used which could have caused serious injury or death. (*Uniform Crime Reporting Handbook, 1984, p. 66 and Uniform Crime Reporting Handbook, NIBRS Edition, 1992, p. 63*)

Other assaults not causing injury should be included if they involved more than mere verbal abuse or minor resistance to an arrest. In other words, all assaults on officers with or without injuries should be included on this form. (*Uniform Crime Reporting Handbook, 1984, p. 66 and Uniform Crime Reporting Handbook, NIBRS Edition, 1992, p. 63*)

If no officers are killed or assaulted during a given month, the LEOKA form need not be submitted. However, the NO LAW ENFORCEMENT OFFICERS

KILLED OR ASSAULTED box on the Return A should be marked (*Uniform Crime Reporting Handbook, 1984, p 66*)

HATE CRIMES

Hate Crime data is to be submitted in addition to other UCR Program requirements (*Hate Crime Data Collection Guide Collection Guidelines, Revised October 1999, p. 8*)

If no reportable hate crime data exists for the current collection period, the agency submits the Hate Crime Report with the appropriate box checked. (*Hate Crime Data Collection Guidelines, 1999, Appendix II, pp. 17-22*)

Agencies participating in NIBRS, which are able to include the hate crime data element in their submission should contribute data in NIBRS format. (*Hate Crime Data Collection Guidelines, Revised October 1999. P. 10*)

In incident based reporting, incidents which do not involve any facts indicating bias motivation on the part of the offender are to be coded as 88=NONE ... in data element 8A. (*Hate Crime Data Collection Guidelines, Revised October 1999, p. 14*)

In incident based reporting, incidents involving ambiguous facts (i.e. where some facts are present but not conclusive) should be coded 99=Unknown in data element 8A. (*Hate Crime Data Collection Guidelines, Revised October 1999, p. 14*)

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

Edition 3

**Uniform Crime Reporting
Newsletter / Updates
Incident Based Reporting Standards**

JURISDICTION GUIDELINES

To be certain that an offense is not counted more than once by overlapping jurisdictions, the law enforcement agency reports only offenses that occur within their jurisdiction (*Uniform Crime Reporting Handbook, 1984, p.3 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 6*)

Agencies report only those arrests made for offenses committed within their own jurisdiction (*Uniform Crime Reporting Handbook, 1984, p. 3 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 5*)

An agency should only report the value of property stolen in its jurisdiction as well as the value of recovered property originally stolen in its own jurisdiction. (*Uniform Crime Reporting Handbook, 1984, p. 49 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 43*)

The recovery of property is reported only by the jurisdiction from which it was stolen. (*Uniform Crime Reporting Handbook, 1984, p. 3 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 43*)

CLEARANCES

Part I offenses reported on the Return A can be cleared either by arrest or exceptional means (*Uniform Crime Reporting Handbook, 1984, p. 41*)

An offense is cleared by arrest or solved for crime reporting purposes when at least one person is:

- Arrested;
- Charged with the commission of the offense; and
- Turned over to the court for prosecution (whether following arrest, court summons, or police notice).

Uniform Crime Reporting Handbook, 1984, p. 41)

In certain situations, law enforcement are not able to follow the three outlined steps under clearance by arrest to clear offenses. If the following questions can all be answered YES, the offense can then be cleared exceptionally for crime reporting purposes.

- Has the investigation definitely established the identity of the offender?
- Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
- Is the exact location of the offender known so that the subject could be taken into custody now?
- Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?
-

(Uniform Crime Reporting Handbook, 1984, p. 42 and Uniform Crime Reporting Handbook, NIBRS Edition, p. 34)

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

Edition 4

**Uniform Crime Reporting
Newsletter / Updates
Incident Based Reporting Standards**

Arrests (Summary)

Count one arrest for each separate occasion on which a person is arrested (*Uniform Crime Reporting Handbook, 1984, p. 60*)

If a person is arrested for several offenses, both Part I and Part II, ignore the Part II crimes and score only the Part I crime appearing highest on the list of Crime Index offenses. (*Uniform Crime Reporting Handbook, 1984, pp. 58-59*)

If a person is arrested for several Part II offenses, the agency itself should determine which is the most serious and score only that one arrest. (*Uniform Crime Reporting Handbook, 1984, p. 59*)

PUBLICATIONS

To ensure the production of a reliable set of crime statistics and the best reporting possible, handbooks and training guides are available to assist participating agencies in the understanding and completing of reporting crime data. To obtain handbooks call the State Police UCR Unit at 444-1156 or refer to the Rhode Island State Police Web site at www.risp.ri.gov and click on the Crime Statistics link. It is of the utmost importance that UCR/RMS managers have a thorough understanding of the UCR and NIBRS reporting standards and guidelines.

Publications available:

- Uniform Crime Reporting Handbook
- Uniform Crime Reporting Handbook, NIBRS Edition
- The NIBRS Volume 1: Data Collection Guidelines
- The NIBRS Volume 2: Data Submission
- The NIBRS Volume 4: Error Message Manual
- Law Enforcement Officers Killed and Assaulted
- Hate Crime Data Collection Guidelines
- Crime in the Unites States
- Crime in Rhode Island
- Program Bulletins
- Newsletters

RECOMMENDED VERIFICATION AND VALIDATION PROCEDURES

A tracking procedure should be in place to determine that arrests, clearances, and/or unfounded cases are reported accurately.

All offenses/incident reports should be double-checked to ensure that each report is being submitted correctly for crime reporting purposes.

A summarized report should be created (written or computer) prior to submitting data to the State Police.

A procedure/guideline should be in place to ensure timely submissions to the State Police.

NEWSLT4.DOC

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

January 2003

Uniform Crime Reporting Newsletter / Updates

Policies

In August of 2002, the Rhode Island State Police announced that we are enhancing the UCR Program to meet the National Incident Based Reporting System (NIBRS) standards and guidelines provided by the Federal Bureau of Investigation.

Crime reporting is shifting from UCR summary based crime reporting to incident based crime reporting. Incident based reporting (IBR) will greatly expand the view of crime and arrest activities.

The method of generating IBR data will vary depending on the RMS software application. If you have not done so already, it is recommended that you contact your software vendor to obtain instructions on exporting IBR data from your RMS software.

As of January 2003, we request your support in submitting electronic IBR data **AND** summary based crime data. Electronic data should be sent on diskette or CD and sent with the summary based reports to:

Rhode Island State Police
UCR Unit
311 Danielson Pike
North Scituate, RI 02857.

If you have any questions, please do not hesitate to call the UCR Unit at 444-1156.

RHODE ISLAND GENERAL LAWS /IBR CODES

To enforce a well-built foundation for this crime collection system it was necessary to evaluate each state statute and correlate an appropriate Incident Based Reporting code to meet the national standards and definitions provided by the Federal Bureau of Investigation.

With the support of the Department of Attorney General, and the Education and Training Services Unit of the FBI we have completed this phase of the project. The final report is available in an Excel format on the Rhode Island State Police web site at www.risp.ri.gov/ by clicking on the crime statistics link. This file should be the table used by the preliminary officer when entering data in the records management system and is the standard file that should be used in reporting crime data to the Rhode Island State Police.

Please note that several state statutes are listed on the report multiple times, this is due to the fact that state statute definitions cross the NIBRS definitions. In these cases, the preliminary officer should select the conforming offense according to the NIBRS offense classification.

Rhode Island UCR On Line

To obtain the most current information on Rhode Island crime reporting, go to www.risp.ri.gov and click on the crime statistics link.

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

May 2003

Uniform Crime Reporting Newsletter / Updates

An incident is defined for NIBRS reporting purposes as one or more offenses committed by the same offender, or group of offenders acting in concert, at the same time and place.

Acting in concert requires that the offender actually commit or assist in the commission of the crime/s. The offender must be aware of, and consent to, the commission of the crime/s; or even if non-consenting, their actions assist in the commission of the offense. This is important because all of the offenders in an incident are considered to have committed all of the offenses in the incident. If one or more of the offenders did not act in concert, then there is more than one incident.

Same time and place means that the time interval between the offenses and the distance between the locations where they occurred were insignificant. Normally, the offenses must have occurred during an unbroken time duration and at the same or adjoining locations.

Example: Two offenders robbed a bar. The bartender was forced at gunpoint to surrender money from the cash register. The robbers also took money and jewelry from three customers. One of the robbers, in searching for more customers to rob, found a female customer in the rest room and raped her there outside of the view of the other offender. When the rapist returned,

both robbers left. There were two incidents, one involving robbery and the other involving forcible rape, because the offenders were not acting in concert in both offenses.

Example: Same situation as above, except that the rape occurred in the bar and the other offender told the rapist to stop and only rob the victim. There was only one incident with two offenses, i.e. robbery and forcible rape. Although the other robber did not consent to the rape, by displaying a gun he prevented someone coming to the victim's assistance and thereby assisted in the commission of the crime.

Offense Data

In NIBRS all Group A offenses occurring in an incident are to be reported, care must be taken to identify all such offenses involved in an incident. For example, a rape case might also involve the crimes of motor vehicle theft and kidnapping, and they should all be reported. Care must also be taken to ensure that each offense which is reported is a separate, distinct crime, rather than just part of another offense. For example, every robbery includes some type of assault; but because the assault is an element, which makes up the crime of robbery, only robbery should be reported. If during a robbery, however, the victim is forced to engage in sexual relations, both robbery and forcible rape should be reported, because forced sexual intercourse is not an element of robbery. Burglary is another example in that it almost always includes a larceny offense. Because burglary is however, defined in

terms of theft, only the burglary is to be reported. Offense data describe the various types of offenses involved in the incident .

Record each code only once even though there may have been more than one victim per offense. One set of data is to be submitted for each code reported.

Example: If an incident involved a robbery and rape, two sets of offense data should be reported – one with the UCR offense code of “120” Robbery and the other with “11A” (Forcible Rape).

Example: Even if two females were raped as in the above example, only one set of offense data should be reported with the offense code “11A.” The two rape victims would be recorded in the victim section.

Number of Premises Entered

Report this information ONLY if the crime is Burglary and the location is “Hotel/Motel/Etc” or “Rental Storage Facility.” In such cases, the number of structures entered is to be reported. Include in the total the number of individual rooms, units, storage compartments entered.

Example: A self-storage building was burglarized and 11 rented storage compartments were forcibly entered. The owner/manager of the building reported the incident to police. Since the offense was burglary and the location a rental storage facility, the 11 compartments entered should be reported.

Example: A private residence was burglarized. Again, the offense was burglary, but because the location was not a hotel/motel or rental storage

facility, no information should be recorded concerning the number of premises entered.

Law enforcement should classify and report offenses after preliminary confirmation of a call for service or a complaint establishes that a crime was, in fact committed. Offenses known to law enforcement are to be recorded, not findings of a court, coroner, jury, or decision of a prosecutor since crime statistics generated from NIBRS are intended to assist in identify law enforcement problems.

Jurisdictional Reporting Rules

- Report offenses that occur within your city/town boundaries
- Report only those arrests made for offenses committed within your city/town boundaries
- The recovery of property is reported only by the agency that first reported it missing and/or stolen

The purpose of reporting UCR data is to depict the nature and volume of crime in a particular community, not to claim or take credit for the number of investigations, arrests, etc, or to serve as a measurement of workload. UCR crime data does not articulate who reported the crime, nor does the data show who is investigating the crime. The data simply depicts what crimes have occurred and where. Jurisdictional Reporting Rules, provide for “most local” reporting.

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

August 2003

Uniform Crime Reporting Newsletter / Updates

UCR Quality Assurance Reviews Will be Offered Triennially

Effective October 1, 2003, the CJIS Audit Unit (CAU) will make Quality Assurance Reviews (QARs) available to the UCR Program once every 3 years. Currently, all reviews and audits originating from the CAU are scheduled biennially. However, to comply with generally accepted government auditing standards, the CJIS Division will audit each Control Terminal Agency once every 3 years. Audits will include reviews of compliance with policies related to participation in the National Crime Information Center, Interstate Identification Index, National Instant Criminal Background Check System, Criminal History Record Information, and National Fingerprint File. In conjunction with the audit of these programs, the CAU will schedule QARs to monitor participation in the Uniform Crime Reporting (UCR) Program.

The QAR is designed to assist participating agencies in collecting and reporting accurate and complete crime data. Its mission is to assess the quality and reliability of UCR data and to evaluate the adherence to national UCR Program guidelines. The QAR focuses on the six requirements for the UCR Program and includes an analysis of classification and scoring procedures, clearances, property values, arrest counts, resubmission of errors, etc. Although the QAR process

remains the same, it will now be part of the newly revised triennial schedule that was recommended by the Criminal Justice Information Services Advisory Policy Board and approved by the Director of the FBI.

It is anticipated that Rhode Island QAR will be scheduled for the summer of 2005.

Electronic Availability of UCR Newsletters

The Uniform Crime Report (UCR) newsletters are available on the crime statistics link on the Rhode Island State Police Web Site at <http://www.risp.ri.gov/>.

Hardcopies of the newsletters are also mailed through the U.S. Postal Service and distributed to all UCR/RMS managers.

It is the responsibility of the UCR/RMS manager to disseminate the information as appropriate to your department members.

DIVISION OF STATE POLICE**

July 2004

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Guidelines and Standards

Bias Motivation/Hate Crimes

It is necessary to reiterate National Guidelines, due to discrepancies in reporting Hate Crimes to the State UCR Unit when using the code of 99 (Unknown Hate Crime).

If a case does not involve any facts indicating a Hate Crime occurred, the code of 88 (no bias) should be selected. The code of 99 (Unknown Hate Crime) is used **ONLY** when facts are present that a Hate Crime occurred, but are not conclusive.

The Newest version of the IMC software application (Version 4.5 Build 7.11) has an enhanced feature to assist the RMS/UCR Coordinator in identifying cases involving Hate Crimes. The Error Detection – All Cases Report has the option to list incidents with Hate Crimes.

The “Report Cases with Hate Crimes Entered” report should be used by your department to audit your cases.

In addition to this feature, the State UCR Unit will be generating reports to audit statewide electronic IBR submissions. Periodic reports will be sent to your attention for review. Your

Frequently asked questions. . .

While an individual is shopping for a pair of shoes in a department store and leaves a handbag unattended the handbag is stolen. *This would be reported as a Larceny Theft from a building.*

A vehicle is parked in an automobile dealership and the vehicle window is broken and damage to the steering column is observed by the preliminary officer who reports to the car lot. *This would be reported as attempted Motor Vehicle Theft.*

A carjacking is reported to police. *This would be reported as a Robbery, and the vehicle taken would be listed in the property section.*

A house is burglarized and a motor vehicle is taken from the garage of that house. *This would be reported as a Burglary and the vehicle taken would be listed in the property section.*

An individual test-drives a vehicle from a dealership and does not return. *This would be reported as a fraud offense and the vehicle taken would be listed in the property section.*

The incidence of a chauffeur who steals a car entrusted to his care. *This would be reported as embezzlement and the vehicle taken would be listed in the property section.*

A male slipped a date rape drug into a woman's drink. Before he could lure the victim away from her friends, however, someone noticed what he had done and contacted the police. The police found the drug and identity of the suspect. He determined that the suspect had administered the date rape drug with the intent to incapacitate the woman and commit a sexual assault. *This would be reported as an attempted forcible rape.*

An officer ascertained that a male had slipped a date rape drug into a woman's drink, but he was unable to determine the perpetrator's intent. *This*

would be reported as an aggravated assault. Because the officer was unable to determine the suspect's intention the incident cannot be counted as an attempted rape. The UCR Program considers a date rape drug as poison and poisoning is among the offenses included in aggravated assault.

A lone male enters a department store to purchase a \$400 TV and \$300 VCR with a forged check. Later, the store manager was notified that the purchase was made with a forged check. The manager contacts police to file a report. *Two offenses would be reported:*

Offense 1 - Counterfeiting/Forgery (Type Property Loss = Counterfeited/ Forged, Property Description = Negotiable Instruments \$700)

Offense 2 - False Pretenses/Swindle/ Confidence Game (Type Property Loss = Stolen, Property Description =

Radios/TV/VCR, Value of Property = [wholesale value]

A vehicle is entered by means of smashing the passenger side window and \$10 in currency is stolen. *This would be reported as Destruction/Vandalism of Property, the Property Description would be Vehicle Parts/Accessories and the Value of Property would be for the damage to the window. Also, the offense of Larceny/Theft and the Property Description would be Money and the Value of Property would be \$10.*

The designated UCR/RMS Manager at each law enforcement agency acts as the liaison between the State UCR Program and officers employed at the law enforcement agency. Therefore, it is important that the UCR/RMS Manager work with officers to answer questions and ensure UCR standards are met. Officers questions should NOT go unanswered and it is the responsibility of the UCR/RMS manager to disseminate the information as appropriate to your officers.

If the UCR Manager has any questions on classifying and scoring crime information, please contact the State UCR Unit and we will work with you to resolve the issue.

Also, if you would like more challenging examples to score, please contact the UCR Unit with your scenario, and we will include examples in the UCR Newsletter.

UCR Newsletters should be filed in the *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book. Should you have any comments or questions, please call the UCR Unit at 444-1156.

Uniform Crime Reporting

Newsletter / Updates

In order for the Uniform Crime Reporting Unit to provide optimum support to local/state law enforcement, the UCR Unit requests your recommendations and suggestions to assist in enhancing the services offered by the Unit.

The mission of the UCR Unit is to support local/state law enforcement in collecting accurate incident based crime data in accordance with NIBRS standards while continuously looking for ways to improve its services. The completion of this survey will assist the UCR Unit in obtaining information from the agency's perspective to enhance the crime collection process. We realize that converting to an Incident Based Crime Reporting System is not an easy transition and requires numerous hours error checking, validating, and generating crime reports.

Please complete and fax the completed forms to 444-1141 by **February 6, 2004** to allow time to review the results. All UCR contributors are encouraged to indicate your opinion and rate the following based on a scale of 1 through 5 with 1 = Not Useful and 5 = Very Useful.

	Not Useful				Very Useful
	1	2	3	4	5
1. Overall services offered by the State UCR Unit (Statistical Reports, Newsletters, Web Services, Error Checking Procedures, Data Submission Requirements, Preliminary Release)	<input type="checkbox"/>

Newsletter / Updates**

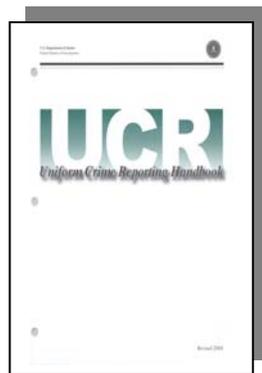

**Uniform Crime Reporting Handbook
2004 Revision**

The "green" UCR handbook should be discarded and no longer used as a reference. The FBI has issued a revised Summary Based edition.

**Discard,
"green" Handbook**

The revised UCR Handbook is available in pdf format on the web by navigating to the Crime Statistics link on the Rhode Island State Police Web site at www.risp.state.ri.us by scrolling to the section entitled Additional Resources. The "green" book is now has a white cover sheet with green writing.

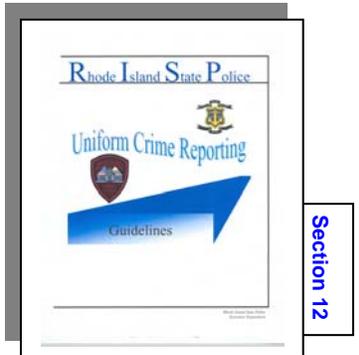

**UCR Handbook
2004 Revision**

RMS/UCR managers are requested to use the UCR Handbook 2004 Revision

as a reference and print copies as needed.

A hardcopy of the revised UCR Handbook should be filed in Section 12 of the Rhode Island Uniform Crime Reporting Guideline Book. Please note that this will be a new section of the Guideline Book. Each RMS/UCR manager should have a Rhode Island Uniform Crime Reporting Guideline Book and is responsible for keeping the Guideline Book current. As an additional resource, this information is available on the State Police Web Site.

**RI UCR Guideline
Book**

To obtain a hardcopy, contact the State UCR Unit at 444-1156.

**NIBRS Modifications/Clarifications
to Data Values, Effective Immediately**

**Expand Property Description Code 27
= Recordings/Audio/Visual**

The NIBRS program has expanded the type of Recording/Audio/Visual Property to include blank or recorded media:

- 27 = Recordings/Audio/Visual (phonograph records and blank or recorded compact discs,

audio or video tapes, digital
video discs, cassettes, etc.)

Examples of Weapon Type Code 15 = Other Firearm

In order to clarify Data Value 15 = Other Firearm (Data Element 13, Type Weapon/Force Involved) , the NIBRS training team has provided examples:

15 = Other Firearm (e.g., bazookas, stinger missiles, and rocket and grenade launchers)

Should you have any questions regarding this communication, please contact the State UCR Unit at 444-1156.

Training

The State UCR Unit offers one-on-one training to UCR coordinators to assist contributing agencies in record practices and crime reporting procedures. Training is available by appointment and will be structured around the needs of the agency. All training should be scheduled in advance.

Should you have any questions or concerns with crime reporting procedures, please contact the State UCR Unit and we will make every effort to address the problem.

This is intended to serve as a support mechanism for UCR contributors while helping to improve crime data submitted to the State UCR Program.

Frequently asked questions, and problem scenarios will be released in the UCR Newsletter, as well as policy updates.

The State UCR Unit has internal procedures of error checking and reviewing all data for accuracy, and we will contact the UCR Contributor when necessary to address crime-reporting

issues. You may be requested by the State UCR Unit to schedule a date to discuss discrepancies and errors reports.

Data Submission Requirements

UCR/IBR data should be validated according to Error Checking Procedures (as listed in the RI UCR Guideline Book, Section 4) and sent to the State UCR Unit no later than 14 days after the close of the reporting period.

Jan 14, 2005	Deadline for agencies to submit 4 th quarter UCR/IBR Data
--------------	--

With the cooperation of local law enforcement, it is anticipated that 2004 Preliminary Release will be disseminated in February 2005 and that Crime in Rhode Island Publication will available on the Rhode Island State Police web site (www.risp.state.ri.us) by March 2005.

Reminder

UCR Newsletters should be filed in the *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

February 2005

**Uniform Crime Reporting
Newsletter / Updates
Incident Based Reporting Standards**

Data Submission Requirements

In accordance with data submission requirements and to assist UCR contributors with data submission, attached are the 2005 monthly IBR labels to be utilized when generating IBR data for the State UCR Program. IBR data must be generated on a monthly basis, after the "IBR Error Detection – All Cases" is performed and is free of critical errors.

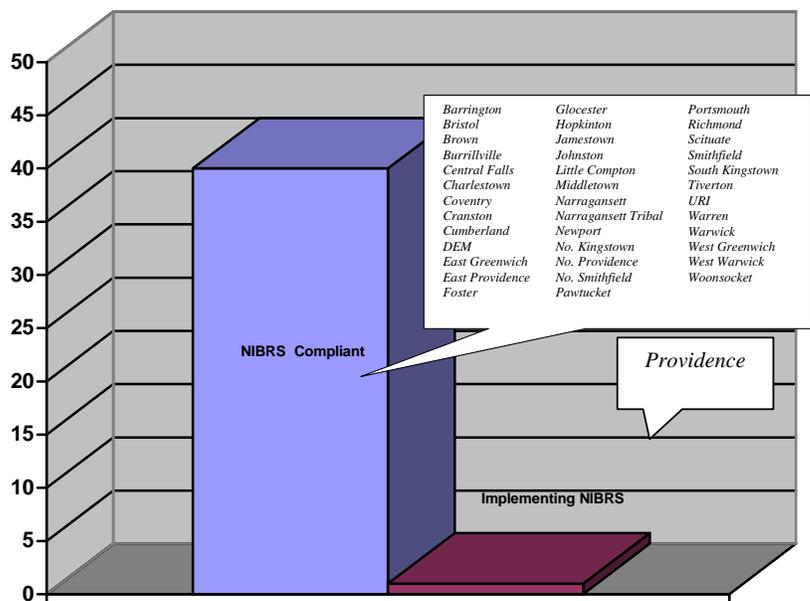

It is strongly recommended that this error detection be performed on weekly basis to eliminate errors with crime data. Agencies that elect to routinely perform weekly error checks are not overwhelmed with problems and validating old information.

IBR Status Report

- As of this writing, 45 law enforcement agencies (including universities and state agencies) are submitting electronic crime data to the State UCR Program.
- In 2004 the Providence Police Dept. announced that the City of Providence signed a contract for a New Windows-based Aegis /MSP Public Safety Software (New World

Systems). After installation, and data conversion it is anticipated the State Program will be receiving electronic IBR data for the Providence Police Dept.

- In 2004 the State Program installed an IBR Statewide Repository (software application developed by Information Management Corp.) and have been testing IBR data with the FBI NIBRS Certification board. It is our goal to meet certification requirements during the next several months. This is a very lengthy process and requires numerous hours error-checking and developing system specifications.
- The State UCR Program has internal procedures of IBR error checking and reviewing all data for accuracy, and we will contact the UCR Contributor when necessary to address crime-reporting issues. You may be requested by the State UCR Program to schedule a date to discuss discrepancies.

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Standards

NIBRS Training

In mid summer, the UCR Unit will be hosting an Incident Based Training program instructed by the FBI CJIS Division training staff. The exact date and location will be announced under separate cover. This training is to assist the RMS/UCR manager with FBI guidelines and to clarify any IBR issues you may have.

The typical two-day (16 Hours) training session involves a brief UCR review, proper classification of offenses (Group A: Crimes Against Persons, Property and Society and also Group B offenses). Definitions of "offense," "incident," the "Hotel Rule," are also covered. Day two is comprised of accurate scoring (i.e. Data Elements and Data Values), Law Enforcement Officers Killed/Assaulted (LEOKA), and Hate Crime data elements.

We are willing to work with you to tailor the training session to your specific needs. If you provide specific case problems or scenarios, we will include the scenarios in the case problems. This is your training seminar and we strongly encourage your input and comments prior to the development of the training material.

To allow ample time for training material, all requests should be made by the end of April. Please send to:

Fax Number 444-1013
E-Mail Address Linda@risp.state.ri.us

We look forward to hearing from you.

UCR Quality Assurance Review

Compliance with UCR/IBR policy and procedures is essential to ensure accurate crime data. Conformity with national UCR guidelines will become more critical as law enforcement agencies integrate with other crime information databases. To ensure data accuracy a **FBI Quality Assurance Review (QAR) will be conducted in September 2005**, law enforcement agencies will be randomly selected.

Agencies will be notified approximately 45 days prior to scheduled review to gather basic information regarding the flow of reports from the time an offense is reported to its classification, scoring, and submission. During the initial contact call, the FBI auditors discuss logistics pertaining to the on-site review. The FBI auditors then follow up with written confirmation on the scheduled QAR to the Chief that will give general information concerning the QAR process.

During the UCR QAR, a team of FBI Auditors will be conducting an on-site review at local law enforcement agencies. In the first phase, the QAR team will meet with the RMS/UCR Manager to perform an Administrative Review, consisting of questions and learning how an agency manages crime reports and whether the data submitted comply the national definitions and guidelines.

The second phase will be a Data Quality Review, which is an actual assessment of your incidents and arrests and involves reading narratives and auditing data values for each case. Incidents and arrests will be randomly selected and reviewed to ensure accuracy. The UCR QAR is very similar to the NCIC/RILETS Audit.

The third phase consists of the Exit Briefing where the FBI Auditors will finalize the findings of the review conducted. The assessment helps identify areas in the recordkeeping procedures/guidelines that could be addressed to reduce the likelihood of incomplete or inaccurate data being submitted. The RMS/UCR Manager has an opportunity to review each of the discrepancies and either agree or disagree with the findings of the review. In addition, the FBI Auditors will answer any questions the agency may have.

Rhode Island UCR Guideline Book

Each RMS/UCR Manager received at least one hardcopy of the Rhode Island **UCR Guideline Book**, which contains FBI specifications and RI regulations governing the Uniform Crime Reporting

Program. Additional copies are available on the State Police web site, by navigating to the Crime Statistics link and scrolling to the Section entitled Additional Resources (www.risp.state.ri.us).

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Standards

Resident Status (of victim)

It has been brought to the attention of the State UCR Unit that agencies are not clear on reporting standards for the field of **Resident Status (of Victim)**.

A "Resident" is a person (victim) who maintains his/her permanent home for legal purposes in the city/town where the crime took place. Please be sure to reiterate this to all department members who enter case reports in your Records Management System.

Due to the large number of cases reported as "Nonresident" and "Unknown", it is necessary to address this matter. The State UCR Unit will be distributing Quality Assurance Reports to agencies, which will list incidents and arrest cases reported as non-resident and unknown. In an effort to avoid lengthy error reports for your department, please be sure to remind department members on the correct method for entering case reports in your Records Management System.

REMINDER - NIBRS Training

IBR Training will be held the week of June 13th at the Community College of Rhode Island, Knight Campus in Warwick. This training is to assist the RMS/UCR manager with FBI guidelines and to clarify any IBR issues you may have. This training is opened to UCR Coordinators, RMS Administrators, Department Trainers, and any other technical staff who would benefit from IBR training. Please be sure to register!

Mail-In-Audit

As required by National Standards, audit reports were distributed to UCR participants on May 4th.

If you have not already returned your completed report, please submit the report to the State UCR Unit within the next week.

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE

November 2005

CHANGE OF POLICY

Data Submission Requirements

Effective January 2006, UCR Contributors are requested to submit electronic IBR data to the State UCR Unit on a monthly basis, as opposed to quarterly. Monthly submissions should be sent to the State UCR Unit no later than 7 days after the close of the reporting period.

Also, effective January 2006, UCR Contributors no longer need to submit hardcopy Summary Based Reports (which includes, Return A, Supplement Return A, Juvenile Arrest Reports, Adult Arrest Reports, Law Enforcement Officers Killed or Assaulted, and Alcohol Impairment Reports).

As required by Rhode Island General Laws, UCR Contributors should continue to send hardcopies of monthly Hate Crime Reports, and Quarterly Hate Crime Reports. Please be sure to include these reports with your electronic IBR Data.

Attached is the revised policy on Data Submission Requirements, dated November 2005. Please file this policy in Section 4 of your *Rhode Island Uniform Crime Reporting Guideline Book*.

NEWSLT 05November.DOC

Crime in Rhode Island, 2005

With the cooperation of local law enforcement, it is anticipated that 2005 Preliminary Release will be disseminated in February 2006 and that Crime in Rhode Island Publication will be available on the Rhode Island State Police web site (www.risp.state.ri.us) by March 2006.

The 2005 Crime in Rhode Island Publication will be based upon Incident Based Reporting. This will be the first year this type of data will be published.

Because of the difference in the number of offenses reported in the Summary system vs. Incident Based Reporting both in an incident and the number of classifications reported, trend information will not be available from the Rhode Island State Police until we collect at least several years of Incident Based Data. We strongly discourage agencies trying to compare the IBR data to any data previously released or converting IBR data to Summary data. The data sets are not comparable due to the number of types of crimes reported and the fact that multiple offenses are reported in one incident.

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any questions, please call 444-1156.

CHANGE OF POLICY

Data Submission Requirements

Bias Motivation/Hate Crimes

Effective January 1, 2007, UCR Contributors are no longer required to submit hardcopy Hate Crime Incident and Quarterly Hate Crime Reports. The State UCR Unit will export Bias Motivation/Hate Crimes information directly from the IBR data at the state level.

If a case does not involve any facts indicating a Hate Crime occurred, the code of 88 (no bias) should be selected. The code of 99 (Unknown Hate Crime) is used ONLY when facts are present that a Hate Crime occurred, but are not conclusive.

The State UCR Unit generates reports to audit statewide electronic IBR submissions. Periodic reports will be sent to your attention for review. Your assistance will be requested to audit data in an effort to obtain accurate crime data.

Should it be determined that a case was coded incorrectly, it will be necessary to modify the incident in your RMS System and the incident will be flagged for resubmission.

Hate Crime Data Collection material issued by the U.S. Department of Justice, Federal Bureau of Investigation is available on the Rhode Island State Police Web site by navigating to the Crime Statistics link available at www.risp.state.ri.us.

UCR Contributors are required to submit electronic IBR data to the State UCR Unit on a monthly basis. Monthly submissions should be sent to the State UCR Unit no later than 7 days after the close of the reporting period. If you have any questions regarding Data Submission Requirements, please call the State UCR Unit.

Attached is the revised policy on Data Submission Requirements, dated November 2006. Please file this policy in Section 4 of your *Rhode Island Uniform Crime Reporting Guideline Book* and discard policy dated November 2005.

For your convenience, enclosed are labels for submitting 2007 IBR data. We request your support in submitting IBR data in a timely manner in accordance with Data Submission Requirements.

Keeping the 'U' in Uniform Crime Reporting

(Source: The CJIS Link, Volume 9, No. 3 October 2006)

(Q) A bar owner breaks up a fight between two men after one man shoves the other and then displays a knife and waves it in a threatening manner. Neither man suffered serious injury. The police respond to the scene and take the two men into custody. Would this be classified as a simple assault or an aggravated assault?

(A) The UCR Program defines assault as “an unlawful attack by one person upon another.” Aggravated assaults are those instances which include use or threatened use of a weapon with the intent to cause severe injury. Simple Assaults include assaults in which the victim did not sustain serious or aggravated injuries and no weapon, other than personal weapons-hands, fists, feet, etc.-were used or displayed. Although the victim was not severely injured, this scenario would be classified as an Aggravated Assault because the offender displayed a knife in a threatening manner.

(Q) Someone using a passkey breaks into five hotel rooms while the occupants are away and takes the TV from each room. Would this be classified as five burglaries or one burglary?

(A) The Hotel Rule applies to this situation. According to the UCR Handbook (2004), “If a number of units under a single manager are burglarized and the offenses are most likely to be reported to the police by the manager rather than the individual tenants, the burglary must be reported as a single offence.” NIBRS guidelines regarding the Hotel Rules are expanded from “hotels, motels, lodging houses, or other places where lodging of transients is the main purpose” to also include mini-storage facilities.

(Q) A resident reports that his motorized wheelchair has been stolen. Is this considered a motor vehicle theft?

(A) Yes. A motorized wheelchair meets the definition of a motor vehicle, “a self-propelled vehicle that runs on land surface and not on rails.

Frequently asked questions ...

After consulting with the UCR Outreach Team, the property value of a stolen motor vehicle license plate, state inspection sticker, or any other motor vehicle decal required for legal operation of the vehicle, would be the replacement cost of the plate and/or decal.

See Page 43 of the Uniform Crime Reporting Handbook, NIBRS Edition under the section "Guidelines for Property Valuation," under Number 4, "Use replacement cost or actual cash cost to victim for new or almost new clothes, auto accessories, bicycles, etc." Stolen MV license plates and/or state/federal issued decals would be coded as property type 38 = Motor Vehicle Parts and Accessories. As such, it meets guideline number 4 under property valuation and therefore, the property value is replacement cost or actual cash cost the victim. (i.e. license plate - \$20.00, state inspection sticker - \$47.00)

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any questions, please call 444-1156.

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Standards

What is an exceptional clearance?

In certain situations, law enforcement are not able to clear an offense know to them by making an arrest (see Cleared by Exceptional Means, UCR Handbook, Page 80).

Often they have exhausted all leads and have done everything possible in order to clear a case. If agencies can answer all of the following questions in the affirmative, they can clear the offense exceptionally for the purpose of reporting to UCR.

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?
(pp. 80-81). UCR Handbook

Proper Reporting of Runaways

Being a runaway does not constitute a criminal offense in the UCR Program; however, the FBI collects data so that

law enforcement agencies can review the handling of runaways. Law enforcement agencies should report the handling of runaways under the age of 18. For UCR purposes, missing persons should not be reported as runaways unless the reporting agency determines that the person under the age of 18 ran away and is not missing.

IBR Data Submission Requirements

Electronic IBR data should be validated according to Error Checking Procedures and sent to the Rhode Island State Police no later than 7 days after the close of the reporting period. A total of twelve (12) submissions per year should be sent to the State UCR Unit, one for every month.

We respectfully request your cooperation in meeting this timeline to ensure submission of data in a timely manner and to maintain credible data.

Recommended Verification And Validation Procedures

A tracking procedure should be in place to determine that offenses/ arrests are reported accurately. Tracking procedure should be kept on file at the UCR Contributing Agency.

All offenses/arrests reports should be double-checked to ensure that each report is being submitted correctly for crime reporting purposes.

A summarized report should be created (written or computer) prior to submitting data to the State Police. This report

should be kept on file at the UCR Contributing Agency.

A procedure/guideline should be in place to ensure timely submissions to the State Police. This procedure/guideline should be kept on file at the UCR Contributing agency.

Training

The FBI Training Team, State UCR Unit, and IMC (RMS Software Vendor) will be providing training in September on the National Incident-Based Reporting System. Training will be hosted by the Rhode Island State Police and will include classifying crimes, exceptional clearances, scenario applications and common discrepancies. This training seminar is free of charge; however, lunch and beverages are not included.

This training is opened to UCR/RMS Coordinators, department trainers, and any other technical personnel who would benefit. We welcome your comments and suggestions on material to be discussed. Please contact the State UCR Unit and we will make every effort to include your topic.

An important aspect of the IBR Program is the guarantee of consistency and comparability in crime data. Therefore, it is recommended that each department UCR/RMS Coordinator attend the full two-day program. Each department has been notified in writing and telephonically.

Also, the State UCR Unit offers one-on-one training to assist agencies in record practices and crime reporting procedures. Training is available by appointment and will be structured around the needs of the agency. All training should be scheduled in advance.

Quality Control Reports

In an effort to insure the accuracy of data in the Uniform Crime Reporting Program (UCR) database, the State UCR Unit consistently review all submissions for discrepancies. A list of those NIBRS incidents which are questionable are sent to the RMS/UCR Administration for their attention. All adjustments must be made electronically in order for the national database to be updated. The following are examples of some of the most common discrepancies found in the NIBRS incidents submitted:

1. Burglary (offense code 220) and Larceny-theft (offense codes 23 A-H) reported in the same incident. * See Volume 1: Data Collection Guidelines p. 24 "For NIBRS purposes, Larceny-theft is an element of Burglary . . ."
2. Data Element 15, Property Description (01) aircraft is being reported as property stolen * See Volume 1: Data Collection Guidelines p. 83
3. Data Element 15, Property Description (29) Structures-primarily structures single, (30) Structures other dwellings, (31) Structures other commercial/business, (32) Structures industrial/manufacturing, (33) Structures public/community, etc. These are reported as the property taken in Larceny-theft all other (23H). *See Volume 1: Data Collection Guidelines p. 84
4. Aggravated assaults (offense code 13A) with no weapon and no injuries reported. * See Volume 1: Data Collection Guidelines pp.22-23.
5. Simple assaults (offense code

- 13B) with injuries (minor) and no weapons. * See Volume 1: Data Collection Guidelines p. 23
6. Arson (offense code 200) using Property Description 15, (77) other with high dollar values as burned reported. * See Volume 1: Data Collection Guidelines p. 85.
 7. Negligent Manslaughter (offense code 09B) being reported and are seeing the weapon reported as vehicle and offender suspected of using, Data Element 8, using alcohol and drugs (A, D). The possibility of Driving Under the Influence (DUI) deaths being reporting under 09B offense code is being questioned. * See Volume 1: Data Collection Guidelines p.29
 8. Incest (offense code 36A) using wrong relationship codes, Data Element 35, i.e., (FR, AQ, OK, BG, etc.). * See Volume 1: Data Collection Guidelines pp. 97-98.
 9. Incest (offense code 36A) and Statutory Rape (offense code 36B) seeing ages of victims 08 years and under in frequent amounts. Should consider forcible rape because a person 4 years of age does not have the mental capacity for consensual sex. * See Volume 1: Data Collection Guidelines pp. 33-34
 10. Data Element 3, Incident Date/Hour (00) used often in many incidents for NIBRS. This indicates the offense occurred on or between midnight and 0059. If the incident hour is unknown, the hour should be left blank. * See Volume 1: Data Collection Guidelines p. 69.
 11. Data Element 13, Type Weapon /Force Involved, (40) personal weapons is often indicated in forcible sex offenses. The definition infers that some force is going to be used during the commission of the offense. Submitting personal weapons as being used in every forcible sex offense should not be automatic, especially in cases where the victim succumbs to the offender out of fear. However, weapons should be indicated when the victim sustains minor injuries, or wherein the offender uses a weapon or displays it in a threatening manner, or the victim suffers obvious severe or aggravated bodily injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness. * See Volume 1: Data Collection Guidelines pp. 80-81
 12. Shoplifting (offense code 23C) with Data Element 25 individual (I) as the victim. The majority of these incidents should indicate that a business (B) is the victim.
 13. Some NIBRS data indicates a broad range for victim/offender ages, Data Element 26. Example is 01-99 as the victim/offender age reported in a particular incident. The national Program will indicate the middle of the range, (49). It is important to narrow the range of age one of reason, i.e., 25-35. * See Volume 1: Data Collection Guidelines, pages 91-92
 14. Data Element 35, Relationship(s) of Victim to Offender(s). Some of the data indicates a 10 year old being a parent.
 15. Data Element 15, Property

Description (99) = (blank). This is a special category to be used by the national UCR Program to compile statistics on certain designated types of property, e.g., cellular phones, which are the object of theft fads. Currently this is not used by the national UCR Program. Some NIBRS data contains this very code which is not currently being used. * See Volume 1: Data Collection Guidelines p. 85.

16. Data Element 26 Age (of Victim). Some data indicates a 99 year old as the victim. In NIBRS 99 = Over 98 Years Old; 00 = Unknown.

17. In incidents of Theft of Motor Vehicle Parts or Accessories (23G), Data Element 15 contains Property Description (26) Radios/TV's/VCRs in many instances. In all probability this should be Property Description (38), Vehicle Parts/Accessories.

reported the crime, nor does the data show who is investigating the crime. The data simply depicts what crimes have occurred and where. Jurisdictional Reporting Rules, provide for "most local" reporting.

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

Jurisdictional Reporting Rules

Report offenses that occur within your city/town boundaries.

Report only those arrests made for offenses committed within your city/town boundaries.

The recovery of property is reported only by the agency that first reported it missing and/or stolen.

The purpose of reporting UCR data is to depict the nature and volume of crime in a particular community, not to claim or take credit for the number of investigations, arrests, etc, or to serve as a measurement of workload. UCR crime data does not articulate who

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Standards

UCR Quality Assurance Review

Compliance with UCR/IBR policy and procedures is essential to ensure accurate crime data. Conformity with national UCR guidelines will become more critical as law enforcement agencies integrate with other crime information databases. To ensure data accuracy a **FBI Quality Assurance Review (QAR) will be conducted September 16, 17, and 18, 2008**, law enforcement agencies will be randomly selected.

Agencies will be notified approximately 45 days prior to scheduled review to gather basic information regarding the flow of reports from the time an offense is reported to its classification, scoring, and submission. During the initial contact call, the FBI auditors discuss logistics pertaining to the on-site review. The FBI auditors then follow up with written confirmation on the scheduled QAR to the Chief that will give general information concerning the QAR process.

During the UCR QAR, a team of FBI Auditors will be conducting an on-site review at local law enforcement agencies. In the first phase, the QAR team will meet with the RMS/UCR Manager to perform an Administrative Review, consisting of questions and learning how an agency manages crime

reports and whether the data submitted comply the national definitions and guidelines.

The second phase will be a Data Quality Review, which is an actual assessment of your incidents and arrests and involves reading narratives and auditing data values for each case. Incidents and arrests will be randomly selected and reviewed to ensure accuracy. The UCR QAR is very similar to the NCIC/RILETS Audit.

The third phase consists of the Exit Briefing where the FBI Auditors will finalize the findings of the review conducted. The assessment helps identify areas in the recordkeeping procedures/guidelines that could be addressed to reduce the likelihood of incomplete or inaccurate data being submitted. The RMS/UCR Manager has an opportunity to review each of the discrepancies and either agree or disagree with the findings of the review. In addition, the FBI Auditors will answer any questions the agency may have.

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

NIBRS NEWS

December 2007

Uniform Crime Reporting

EVALUATING RMS SOFTWARE

Since January 2005, the state standard for collecting and maintaining crime data is the National Incident Based Reporting System (NIBRS). The Rhode Island system is mirrored after NIBRS, with few exceptions.

If you are shopping around and evaluating Records Management Systems (RMS) be sure the software is NIBRS compliant. Ask the software vendor for a list of customers who are NIBRS compliant and ask for test data. If requested, the State UCR Unit will test data to verify if the software application meets national standards. You are encouraged to take advantage of this opportunity and determine if the software meets the stringent rules.

To ensure compliance, a NIBRS Certification Process has been developed consisting of statistical reasonableness, updating capability and responsiveness, error rates, and system appropriateness. The Certification Process has been included in this Newsletter.

The required NIBRS edits are detailed in the [FBI manuals](#).

Volume 1: Data Collection Guidelines
Volume 2: Data Submission Specifications
Volume 4: Error Message Manual

These edits range from field-by-field valid code checking to completing detailed logical checks, such as whether property crimes have the required substantive property information, or whether person crimes have the required substantive information about victims.

When the State UCR Unit receives data submissions, an extensive series of checks are run and an incident report is rejected if errors are found. The checks include: value type and position within field; presence of values for mandatory and conditional data elements; use of valid values; duplication if multiple valid values are permitted for a data element; use of logical values and cross-checks between related data elements (e.g., age of child is less than age of parent); presence of required data segments; duplication of segments and/or reports; number and type of segments; segment sequencing; and appropriate links between segments (e.g., an offense segment requires a victim segment).

NIBRS NEWS continued

DEADLINE

Please be sure that your agency is up to date in submitting IBR data so that submissions may be processed and presented in the yearly publications. We ask that all 2007 incident submissions be sent in by January 31, 2007. In order for agencies to be published in *Crime in Rhode Island* and *Crime In The United States* you must submit twelve (12) months of data.

DATA SUBMISSIONS

In the last UCR Audit of local agencies, agencies lost points for not meeting the Data Submission Requirements. Please do not fall behind, error checking and validating data can be very time consuming and if you get behind, it can be more work! We all know you have many responsibilities and we appreciate your cooperation and prompt attention.

Electronic IBR data should be validated according to Error Checking Procedures and sent to the Rhode Island State Police no later than seven (7) days after the close of the reporting period.

For your convenience, we will forward to you a template intended to print on a Avery 6490 labels (3 1/2" Diskette, Laser, Ink Jet) for submitting 2008 IBR data to the State UCR Unit. Please feel free to use this template or print your own. The UCR unit will not be providing labels.

QUALITY CONTROL REPORTS

In an effort to insure the accuracy of data in the IBR Program (UCR) database, we consistently review all submissions for discrepancies. A list of those IBR incidents which are questionable are sent to the RMS/UCR Manager for review. All adjustments must be made electronically in order for the state database to be updated.

The list of Quality Control checks has been included in the Newsletter.

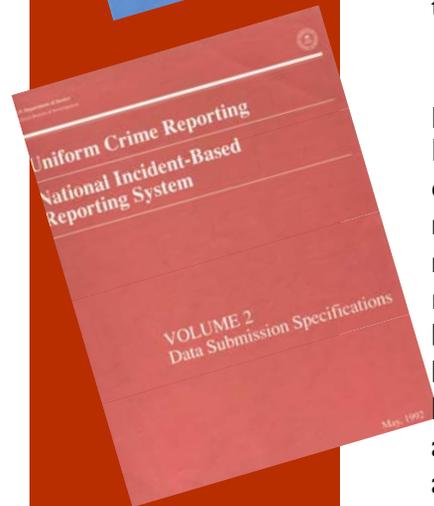

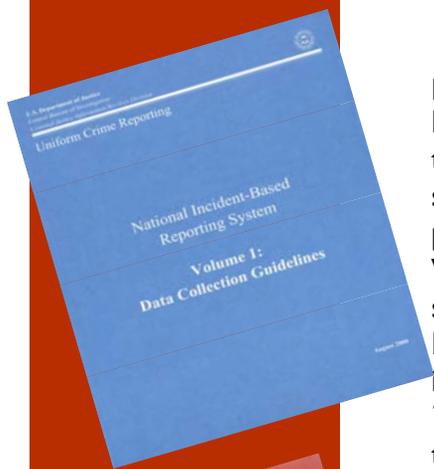

Tip:

In larceny situations where both motor vehicle parts are stolen and articles from the motor vehicle are stolen, report the offense resulting in the greatest value of property lost and report all stolen property.

Reminder

Newsletters should be filed and the RI *UCR Guidelines Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

Training

Special thanks to Ms. Linda Rutherford and Ms. Sarah Wilson, FBI Training Instructors, for providing Statewide training to UCR Coordinators. The training generated interest and enthusiasm in NIBRS. Overall feedback from local law enforcement was excellent. Thank you for your support.

NIBRS— Level I and Level II Training

In response to a need for a standardized mechanism to evaluate a RMS software applications the following certification policy has been developed. This policy is mirrored after the FBI's National NIBRS State Certification Policy. The scope of this policy includes a definition, guidelines, and monitoring procedures.

CERTIFICATION: In granting NIBRS certification, the State UCR Program will notify a local agency that the incident-based reporting (IBR) data will be accepted as NIBRS data. This is not meant to imply that the agency is considered to be IBRS operational, it is a certification that IBR data will be accepted as an official part of the State IBR Program.

IBR SELECTION CRITERIA/GUIDELINES: The following criteria/guidelines will be used by the State UCR Program to grant an agency certification.

Error Rate

Submitted data should be logical and consistent within an incident. The logic of the data is partly measured by error rate as it refers to the percent of incident reports that contain errors in any part of the incident data submission. More specifically, an error rate is defined as the number of rejected reports over total number of reports sent. The State UCR Program requires that an error rate of less than four (4) percent be sustained for three (3) separate submissions. The error rate looks at edits in the system as defined in NIBRS Volume 4, *Error Message Manual* and subsequent UCR Newsletters.

Statistical Reasonableness

While error rate assesses the existence of logical mechanical flaws existing within an incident, it does not address data in the aggregate. Therefore, checks are made with regard to the statistical reasonableness of the submitted data. This process examines statistical aggregate output in terms of percent distribution, data trend, volume and monthly fluctuations.

Updating Capability and Responsiveness

Assessment is made with respect to the ability of an agency to update its reports, meet deadlines, and respond in a timely manner to error messages from the State UCR Program with corrected data. The agency must maintain at least a two (2) year database (retention period) and have the ability to go back to the previous calendar year and update an incident. Adherence to the "Time-Window Rule" detailed in NIBRS Volume 2, *Data Submission Specifications Manual* (available in the Rhode Island Uniform Crime Reporting Guideline Book and the Rhode Island State Police web site at www.risp.state.ri.us). The most important dimension is the ability and capability to respond to error messages.

System Appropriateness

Since the IBR encourages each agency to refine its database, additional fields and refined codes are frequently introduced in agency Incident-Based Reporting systems. Consequently, it is essential that the State UCR Program confirm the systematic compatibility of a prospective agency IBR program with the NIBRS guidelines. An agency that seeks NIBRS certification should submit its IBR system's description including crime category definitions, linkages, coding structure, number of offenses collected per incident, and allowable data entries. The system must be incident-based and cover all data included in NIBRS. This document will be reviewed by the State UCR Program in terms of program design and concept.

It is mandatory that the agency continue to submit IBR data using the old system until the New software has attained NIBRS certification.

Standard Report of Rhode Island General Laws / IBR Codes

It is essential that the State UCR Program confirm that the prospective agency conforms to the Standard Report of Rhode Island General Laws/IBR Codes. To enforce a well-built foundation for a standardized IBR System it was necessary to evaluate each state statute and correlate an appropriate IBR code to meet NIBRS definitions. With the support of the Department of Attorney General, and the Educational and Training Services Unit of the FBI Rhode Island developed a Standard Report of Rhode Island General Laws/IBR Codes. The table file must be locked down and only authorized personnel should have the ability to update the file. Several state statutes are listed on the report multiple times, this is due to the fact that state statute definitions cross the NIBRS definitions. In this case, the preliminary law enforcement officer will select the conforming offenses based on the keywords listed in the Section field according to NIBRS offenses classification. An agency seeking certification should submit the Rhode Island General Laws/IBR Codes table file including, Title, Chapter, Section and IBR Code. All traffic law violations must be coded as 99 which is not included in the NIBRS program.

All agencies must contact the Rhode Island Department Attorney General's Office to obtain a detailed list of court codes and additional requirements.

CERTIFICATION POLICY:

The State UCR Program administers the certification policy. The agency under review will receive a letter from the State UCR Program indicating certification approval (if warranted) or an indication of what additional steps the agency has to follow to obtain approval.

Error Rate: Must be below four (4) percent and sustained for three (3) submissions.

Statistical Reasonableness: Need at least six (6) months of data to quality review.

Updating Capability and Responsiveness: Must show ability to correct errors and resubmit those incidents, as well as making modifications to incidents we already have on file. The agency should show a willingness to submit data and provide corrections in a timely fashion.

System Appropriateness: The State UCR Program will confirm the system compatibility with NIBRS guidelines.

Standard Report of Rhode Island General Laws/ IBR Codes: Agency must conform to the Standard Report (available in Excel format from the State UCR Program.), which is the foundation of the IBR system. Table file must be locked down and only authorized personnel should have the ability to update the file.

Questions regarding the IBR Certification Process should be directed to

E-Mail – Linda@risp.ri.gov

QUALITY CONTROL

In an effort to insure the accuracy of data in the national Uniform Crime Reporting Program (UCR) database, the staff consistently reviews all submissions for discrepancies. A detailed list of those NIBRS incidents which are questionable are sent to the UCR Program Managers for their attention. All adjustments must be made electronically in order for the national database to be updated. The following are examples of some of the most common discrepancies found in the NIBRS incidents submitted:

Burglary (offense code 220) and Larceny-theft (offense codes 23 A-H) reported in the same incident. * See Volume 1: Data Collection Guidelines p. 24 “For NIBRS purposes, Larceny-theft is an element of Burglary . . . ”

Data Element 15, Property Description (01) aircraft is being reported as property stolen * See Volume 1: Data Collection Guidelines p. 83

Data Element 15, Property Description (29) Structures-primarily structures single, (30) Structures other dwellings, (31) Structures other commercial/business, (32) Structures industrial/manufacturing, (33) Structures public/community, etc. These are reported as the property taken in Larceny-theft all other (23H). *See Volume 1: Data Collection Guidelines p. 84

Aggravated assaults (offense code 13A) with no weapon and no injuries reported. * See Volume 1: Data Collection Guidelines pp.22-23.

Simple assaults (offense code 13B) with injuries (minor) and no weapons. * See Volume 1: Data Collection Guidelines p. 23

Arson (offense code 200) using Property Description 15, (77) other with high dollar values as burned reported. * See Volume 1: Data Collection Guidelines p. 85.

Negligent Manslaughter (offense code 09B) being reported and are seeing the weapon reported as vehicle and offender suspected of using, Data Element 8, using alcohol and drugs (A, D). The possibility of Driving Under the Influence (DUI) deaths being reporting under 09B offense code is being questioned. * See Volume 1: Data Collection Guidelines p.29

Incest (offense code 36A) using wrong relationship codes, Data Element 35, i.e., (FR, AQ, OK, BG, etc.). * See Volume 1: Data Collection Guidelines pp. 97-98.

QUALITY CONTROL

Incest (offense code 36A) and Statutory Rape (offense code 36B) seeing ages of victims 08 years and under in frequent amounts. Should consider forcible rape because a person 4 years of age does not have the mental capacity for consensual sex. * See Volume 1: Data Collection Guidelines pp. 33-34

Data Element 3, Incident Date/Hour (00) used often in many incidents for NIBRS. This indicates the offense occurred on or between midnight and 0059. If the incident hour is unknown, the hour should be left blank. * See Volume 1: Data Collection Guidelines p. 69.

Data Element 13, Type Weapon/Force Involved, (40) personal weapons is often indicated in forcible sex offenses. The definition infers that some force is going to be used during the commission of the offense. Submitting personal weapons as being used in every forcible sex offense should not be automatic, especially in cases where the victim succumbs to the offender out of fear. However, weapons should be indicated when the victim sustains minor injuries, or wherein the offender uses a weapon or displays it in a threatening manner, or the victim suffers obvious severe or aggravated bodily injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness. * See Volume 1: Data Collection Guidelines pp. 80-81

Shoplifting (offense code 23C) with Data Element 25 individual (I) as the victim. The majority of these incidents should indicate that a business (B) is the victim.

Some NIBRS data indicates a broad range for victim/offender ages, Data Element 26. Example is 01-99 as the victim/offender age reported in a particular incident. The national Program will indicate the middle of the range, (49). It is important to narrow the range of age one of reason, ie., 25-35. * See Volume 1: Data Collection Guidelines, pages 91-92

Data Element 35, Relationship(s) of Victim to Offender(s). Some of the data indicates a 10 year old being a parent.

Data Element 15, Property Description (99) = (blank). This is a special category to be used by the national UCR Program to compile statistics on certain designated types of property, e.g., cellular phones, which are the object of theft fads. Currently this is not used by the national UCR Program. Some NIBRS data contains this very code which is not currently being used. * See Volume 1: Data Collection Guidelines p. 85

QUALITY CONTROL

Data Element 26 Age (of Victim). Some data indicates a 99 year old as the victim. In NIBRS 99 = Over 98 Years Old; 00 = Unknown.

In incidents of Theft of Motor Vehicle Parts or Accessories (23G), Data Element 15 contains Property Description (26) Radios/TV's/VCRs in many instances. In all probability this should be Property Description (38), Vehicle Parts/Accessories.

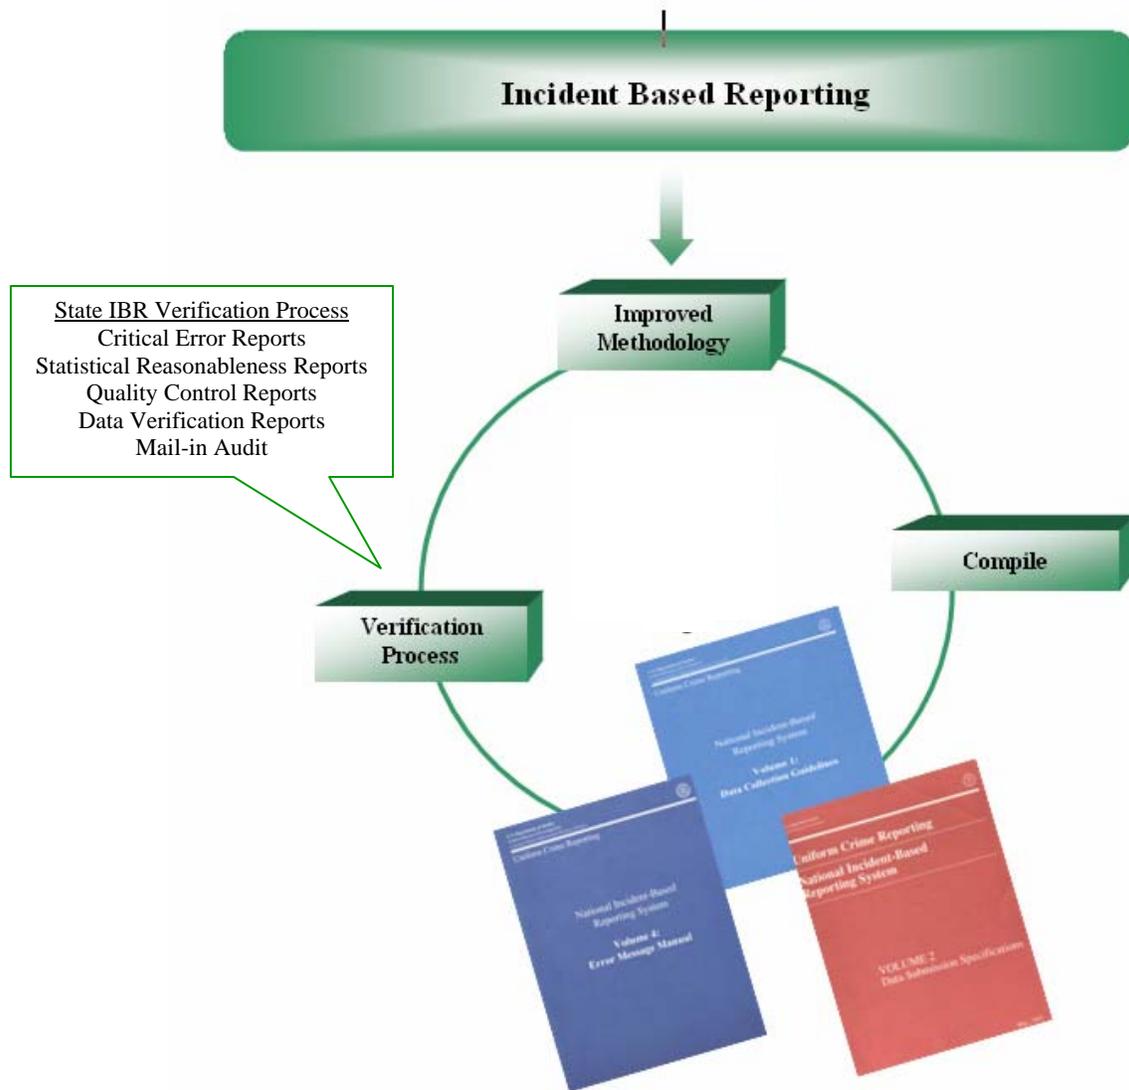

Offender Sequence Numbers of 01, 02, etc., with unknown offender age sex and race information in data elements 37, 38, and 39; this could very well be the case if someone is knocked to the ground and knows only that two suspects perpetrated a crime; however, the national Program review indicates a high volume of incidents which contain offender sequence numbers with unknown information. If there is some descriptive information observed by the victim with respect to any of the sequenced offenders please indicate, i.e., male, female, white, black, etc. Offender Segments are used to describe the offenders in the incident (e.g., their age, sex, and race). An Offender Segment should be submitted for each of the (up to 99) offenders involved in the incident. There must be at least one Offender Segment in each incident report. See Volume 1: Data Collection Guidelines, p. 63.

Estimated Drug Quantity, Data Element 21. See Volume 1: Data Collection Guidelines, p. 89 "This data element should be used to indicate the quantity of drugs or narcotics seized in a drug case. Therefore, it should be used only if one of the offenses in the incident was 35A Drug/Narcotic Violations, 6 = Seized was entered into Data Element 14 ('Type Property Loss/ Etc.), and 10 = Drugs/Narcotics was entered into Data Element 15 (Property Description). If the substance was sent to a laboratory for analysis, and response has not yet been received, then 1 = None must be entered into Data Element 21 to indicate None. This is an interim report and should be later updated with the true quantity." It is apparent the updating of these incidents is not occurring because the computer generated "year-end report" indicates an unusually high amount of 1 = None, remaining in the database.

In many offenses of Credit Card/Automatic Teller Machine Fraud (26B) the national Program is becoming aware of agencies indicating credit/debit cards (09) in Data Element 15 (Property Description) as stolen property reported for this specific offense. The credit/debit card may have been previously stolen, however, the property which was purchased with the stolen credit card should be listed in Data Element 15. According to the *Uniform Crime Reporting Handbook, NIBRS Edition*, page 16, Credit Card/Automatic Teller Machine Fraud is defined as "The unlawful use of a credit (or debit) card or automatic teller machine for fraudulent purposes." This offense does not apply to the theft of a credit/debit card but rather its fraudulent use.

QUALITY CONTROL

It has come to the attention of the national Program that the offense of Robbery (120), data received from law enforcement indicates several robbery incidents with only a business as the victim in Data Element 25 (Type of Victim). According to the *NIBRS Volume 1, Data Collection Guidelines*, page 33, “The victims of a robbery include not only those persons and other entities (businesses, financial institutions, etc.) from whom property was taken (or was attempted to be taken), but also those persons toward whom the robber (s) directed force or threat of force in perpetrating the offense. Therefore, although the primary victim in a bank robbery would be the Financial Institution, the teller toward whom the robber pointed a gun and made a demand should also be reported as a victim.”

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

February 2008

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Standards

Data Submission Deadlines

In order for the State UCR Unit to release crime statistics on time with complete and accurate statistics, all agencies must adhere to the scheduled deadlines. A copy of *IBR Data Submission Requirements* has been included with this newsletter.

Most agencies are conscientious about meeting deadlines; however, agencies that are late with their submissions cause delays in publications, reports for the media and public research groups.

The State UCR Unit realizes that there are always extenuating circumstances that cause an agency to miss a deadline. Nevertheless, the State UCR Unit requests that RMS/UCR Administrators make every effort to adhere to UCR deadlines.

Mail-In Audit

As part of the State UCR Unit quality assurance measures, a mail-in audit will be disseminated to each RMS/UCR Administrator to complete.

Each administrator is required to complete the audit and may use the *Rhode Island Uniform Crime Reporting Guideline Book* as a resource tool.

The Guideline book is also available by navigating to the Crime Statistics link on the Rhode Island State Police web site at ww.risp.state.ri.us.

The audit is designed to ensure participating agencies collect and report accurate and complete crime information and to assess the quality and reliability of data. Audits will include reviews of compliance with policies related to participation in the National Incident Based Reporting System (NIBRS).

Regardless of the extend of the statistical verification process used by the State UCR Unit, the accuracy of the data assembled under this program depends on the sincere effort exerted by each agency to meet the necessary NIBRS standards.

Clarification of the Definition of Resident Status in NIBRS

A "Resident" is a person (victim and arrestee, respectively) who maintains his/her permanent home for legal purposes in the city/town where the crime took place. Please be sure to reiterate this to all department members who enter case reports in your Records Management System. This data element has no correlation to U.S. citizenship.

Clarification Regarding the Definition of Forcible Rape in the Summary System and the NIBRS

It is well known that the NIBRS definition of Forcible Rape allows for the possibility of a male victim and a female offender, which is not permissible in the Summary system. However, there are additional, albeit subtle, differences in reporting forcible rape between the NIBRS and Summary system as well.

In the Summary system, forcible rape is defined as “The carnal knowledge of a female forcibly *and* against her will.” (Emphasis added) In NIBRS, forcible rape is defined as “The carnal knowledge of a person, forcibly *and/or* against that person’s will or not forcibly or against the person’s will in instances where the victim is incapable of giving consent because of his/her temporary or permanent mental or physical incapacity.” (Emphasis added)

The discrepancy exists with the *and/or* wording of the NIBRS definition. Literal interpretations of the definitions indicate that Summary agencies should ensure that *both* circumstances should be met before classifying an offense as a Forcible Rape and NIBRS agencies need only one circumstance to meet the classification. However, the national Program staff do not discern a substantive difference between the two definitions outside of gender; the change in language reflects a clarification of the intent of the collection of this offense rather than a modification.

There is not a substantive difference between the Summary and NIBRS definitions on this particular point, i.e., in either system, the carnal knowledge is obtained forcible *and/or* against the respective victim’s will.

The FBI requests that all law enforcement agencies, report rapes as appropriate.

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

Rhode Island State Police
Uniform Crime Reporting Police

Submission Requirements

November 2005

IBR Data Submission Requirements

Electronic IBR data should be validated according to Error Checking Procedures and sent to the Rhode Island State Police no later than 7 days after the close of the reporting period. A total of twelve (12) submissions per year should be sent to the State UCR Unit, one for every month.

Send to:

Rhode Island State Police
Uniform Crime Reporting Unit
311 Danielson Pike
North Scituate, RI 02857

We respectfully request your cooperation in meeting this requirement to ensure submission of data in a timely manner and to maintain credible data.

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS
DIVISION OF STATE POLICE**

April 2008

Uniform Crime Reporting Newsletter / Updates Incident Based Reporting Standards

Data Submission Deadlines

In the Rhode Island State Police campaign to enforce IBR data submission requirements, a *new* policy has been developed, whereas:

"It is the responsibility of the State UCR Unit, once each quarter, to notify the Superintendent of State Police in writing, of police departments of each city and town that have not complied with IBR Data Submission Requirements. The Superintendent will contact each Police Chief to enforce reporting requirements."

However, the State UCR Unit will continue to send reminders and follow-up calls to UCR Contributors, in a cooperative effort.

Rhode Island Mail-In Audit

On March 24th, the Rhode Island UCR Audit was e-mailed to all UCR Contributors. The audit should be completed and returned to the State UCR Unit by April 14th. All agencies are required to complete and return the Mail-In Audit. The State UCR Unit is available to meet with you to discuss the Findings Report. You are encouraged to take advantage of this opportunity.

Annual Publication – Crime In Rhode Island

The Crime in Rhode Island 2007 publication has been finalized and is available electronically by navigating to the Crime Statistics link on the Rhode Island State Police web site at <http://www.risp.state.ri.us/>.

Also, yearly publications are available electronically for the last eleven years; however, it is not meaningful to compare summary data to IBR data. Not all of the variables can be identified or measured, compounding the error in the results.

Also, keep in mind that all reports are based on a "snapshot" of the database frozen in time and do not reflect the continual updating of the live database by contributing agencies.

FBI On-Site Audit – Reminder

To ensure data accuracy a FBI Quality Assurance Review (QAR) will be conducted September 16, 17, and 18, 2008. Law enforcement agencies will be randomly selected; however, if you would like to participate, please contact the State UCR Unit and we will be sure to include your department.

Incident Based Reporting Standards**

Scenarios

Q. If a burglary in progress is reported by a citizen but the investigation reveals an authorized person is entering the structure or that an open door was the result of the owner's forgetfulness, what is the IBR Code?

A. If you have an authorized person entering into the structure and something comes up missing then you have to look at it being a larceny-theft from a building unless that authorized person is the home owner who locked himself out of his house for example. The element of trespass is important in determining if you have a larceny theft or a burglary. Since the little information provided states that it was an "authorized" person entering the structure then you have to assume that you do not have trespass.

The second part of the question and again I am answering this with the little information that I know would be a burglary if you have someone that is trespassing, and you have a structure, and they are breaking in to commit a felony or a theft. It does not matter if the door was locked or unlocked. If you have these occurring it would be a burglary but it does matter in what type of force. If the door is simply unlocked and I turn the knob and enter the house then you have unlawful entry no force even though I am turning the knob. If I

use a key then that would be a forcible entry. If it is determined through investigation that the person entering the house was authorized to be in the house and they steal something then again you have to look at that as Larceny-Theft from a Building. If the son and daughter used to live at the residence and no longer have a lawful reason to be in the residence and they break in and steal items you still have Burglary if the investigation shows trespass.

Q. If someone steals a remote control airplane out of someone's back yard, what is the IBR Code?

A. Larceny: All other (23H)

Q. If someone steals a remote control airplane out of an open garage, what is the IBR Code?

A. Burglary / Unlawful entry /No force (220)

Reminder

UCR Newsletters should be filed in the RI *UCR Guideline Books* issued to your department. Every department received at least one Guideline Book.

Should you have any comments or questions, please call the UCR Unit at 444-1156.

How will this affect crime trends?

It is not meaningful to compare Summary data to IBR data. Not all of these variables can be identified or measured, compounding the error in the results.

We strongly discourage trying to compare the IBR data to any data previously released or converting IBR data to Summary data. The data sets are not comparable due to the number of types of crimes reported and the fact that multiple offenses are reported in one incident.

The Rhode Island State Police will focus statewide crime reports on data received from law enforcement based on the Incident Based Reporting System and not the Summary Based Crime Reporting system. It is our position that the Summary Based Crime Reporting system is antiquated and does not portray an accurate count of crime.

Therefore, we will focus our statistical analysis reports based on the Incident Based Reporting system.

What are the pitfalls of ranking?

In the past, some law enforcement agencies and researchers compiled rankings of individual jurisdictions. This information can create misleading perceptions, which adversely affect geographic entities and their residents. Jurisdictions should not be ranked because there are many factors that cause the nature and type of crime to vary from place to place. Rankings ignore the uniqueness of each jurisdiction. All jurisdictions are affected in some degree by:

- Density and size of the community population.
- Variations in composition, particularly to youth concentration.
- Economic status, including job availability, median income, and poverty level.
- Stability of population with respect to residents' mobility, commuting factors, and other transient factors.
- Modes of transportation and highway system.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Effective strength of the law enforcement agencies.
- Attitude of the public toward law enforcement problems.
- Climate, including seasonal weather conditions.
- Cooperation of adjoining and overlapping police agencies.
- The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards and guidelines.

What are the major differences between IBR and the Summary?

IBR collects information on up to 10 offenses occurring in the same incident. The Summary system applies a hierarchy rule and only collects information on the most serious offense occurring in an incident and drops the others. Information is only reported on 8 crimes in the Summary system.

By design, IBR measures different aspects of crime than the Summary System. Where Summary measures the overall number of incidents for a Part I crime, IBR measures both the overall number of incidents and the occurrence of each type of crime within every incident.

When is crime data published?

The annual publication, *Crime in Rhode Island*, is traditionally released by the State UCR Unit in April. Crime data is available on the Rhode Island State Police web site www.risp.state.ri.us. Detailed crime reports are sent to the Department of Health, Medical Examiners Office and the Attorney General's Office for additional analysis.

Reports are based on a "snapshot" of the IBR database frozen in time and do not reflect the continual updating of the live database by contributing agencies.

Rhode Island State Police

Colonel Brendan P. Doherty
Superintendent

Rhode Island Incident Based Reporting System

Caveat on Data Usage

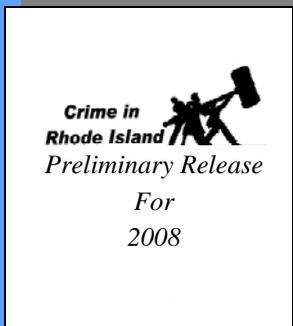

Rhode Island State Police
Uniform Crime Reporting Unit
311 Danielson Pike
North Scituate, RI 02857

Verification Process

Uniformity and accuracy of crime data collected under this program is of primary concern. With the receipt of reports covering all reporting jurisdictions within the State of Rhode Island, the problems of attaining uniformity are readily apparent.

It is standard operating procedure to perform edit checks, quality control checks, reasonableness checks, prepare preliminary reports and administer a statewide mail-in audit.

Prior to compiling *Crime in Rhode Island*, an annual *Preliminary Release* is distributed to each reporting jurisdiction based on the submission of UCR statistics. Each jurisdiction is requested to examine this release and notify the UCR Unit should any discrepancies appear.

Regardless of the extent of the statistical verification process used by the UCR Unit, the accuracy of the data assembled under this program depends on the sincere effort exerted by each contributor to meet the necessary standards of report.

History

The Rhode Island State Police began extensive implementation of the Rhode Island Incident Based Reporting (IBR) system in January 2005 with the financial support of the Crime Identification Technology Act (CITA) Grant, which was awarded to the Rhode Island State Police by the Office of Justice Programs, Bureau of Justice Statistics to assist in upgrading our criminal justice information system.

In June 2005, the FBI certified the Rhode Island Incident Based Reporting system as compliant with their stringent standards for certification in the National Incident Based Reporting System (NIBRS). This is the preferred method of collecting crime data and enforces a higher degree of accuracy and richer information.

Prior to this time, the state standard of collecting and managing crime data consisted of a paper-based Summary Based Crime Reporting system, which was the “old” national standard of collecting crime data. However, recognizing the need for an enhanced crime reporting system a more efficient method was developed nationwide – National Incident Based Reporting System.

What is IBR?

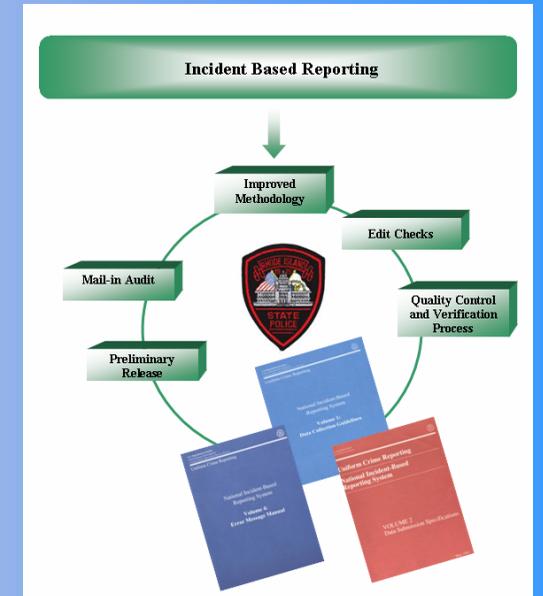

Incident Based Reporting views a crime and all of its components as an “incident.” In order to obtain important data, facts recorded and preserved about the incident are organized into specific categories or segments. The vehicle used for recording these facts is a “data element.” Data elements provide information about crime and its involvement with victims.

IBR is designed to collect data on every single crime occurrence and on each incident within the occurrence. The most significant difference between IBR and the traditional Summary Based Crime Reporting system is the degree of detail in reporting. Unlike the Summary system that collects only 8 Part I crimes, IBR collects 22 crime categories made up of 47 specific crimes called Group A offenses. Additionally, arrests are reported for 11 Group B offense categories.

Under the old Summary system only the most serious offense was reported. In IBR up to 10 offenses can be reported in an incident, providing a more accurate picture of crime. Because of the differences between the Summary system and Incident Based, any cross-comparisons would provide inaccurate results in trend analysis.

IBR Goals and Utilization

The goals of IBR are to enhance the quantity, quality, and timeliness of crime data collection by law enforcement and to improve the methodology used for compiling, analyzing, auditing and publishing crime data. A major advantage of IBR is the capability to break down and combine crime offense data into specific information.

The integrity and reliability of data-based analysis and reporting depend, in large part, on the quality of the underlying data captured by each law enforcement agency.
